

Data Technology Hub (DT Hub) Facts at a Glance

Strategic Value

- Accelerate Hong Kong's data-led economic development with the provision of world-class infrastructure, attracting local and international data-intense companies, as well as top talent to co-create data-driven innovative solutions
- DT Hub is an ideal place to nurture a community of ICT companies, supporting them to turn their data assets into genuine value and competitive advantages in driving digital transformation
- As the major initiatives supporting Hong Kong's re-industrialisation drive, DT Hub and the adjacent Advanced Manufacturing Centre (AMC) provide an ideal environment for accelerating R&D and commercialisation with our world-class infrastructure tailored for business innovators in the innovation and technology ecosystem. The synergetic forces between the two projects will further propel the development of new industries

Geographic Advantages

- Strategically situated in the Tseung Kwan O industrial estate, which is home to Hong Kong's largest and most advanced data centres supported by state-of-the-art data infrastructure
- Adjacent to landing stations of major submarine cable systems, DT Hub is built with high-speed connectivity to any location around the world with minimal hops, high reliability and low latency
- Upon its expected completion in 2022, the Cross Bay Link connecting Tseung Kwan O and Lam Tin Tunnel will reduce travel time by car to around 17 minutes to Central, and 8 minutes to Kwun Tong

Features

- A total gross floor area (GFA) of over 290,000 square feet, including a 220,000 square feet working space supporting tenants in developing data-driven solutions
- With professional convention and exhibition areas, DT Hub allows companies to organise workshops, exhibitions, presentations and more, to further nurture industry collaboration and innovation
- Designed with a floor loading of 5-7.5 kPa for heavy equipment installation
- Designed with a minimum clear ceiling height of 3.5 metres and a 400mm raised floor for rack enclosures and uncluttered cable management
- Rare dual power feeds to ensure highly substantial and reliable power supply
- Air-conditioning and on-demand 24-hour chilled water supply (backed up by generator) to cool servers
- Built-in exclusive trunk for on-demand set-up of fibre / copper transmission lines and dark fibre for powerful transmission

Tenant support

- Benefit from the comprehensive value-added services and support programmes within HKSTP's ecosystem, including access to early-stage investment, technology, talent acquisition, business expansion
- Access to one-stop support programmes, including [Leading Enterprises Acceleration Programme \(LEAP\)](#), Student Internship Programme, Accommodation Support, [Global Acceleration Academy \(GAA\)](#), among others
