

## BIOMEDICAL TECHNOLOGY

### MJ 水凝膠止癢敷料為燒傷康復者帶來佳音 MJ Antipruritic Hydrogel: Alleviating Itching Among Burn Patients

香港全球藥物科技有限公司致力研究與開發創新藥物傳遞系統。其中，他們融合多重尖端科技製造的「MJ 水凝膠止癢敷料」，成為中國每年超過百萬燒傷者的救星。原來經歷兩至三度的燒傷或燙傷後，九成患者在傷口結疤後會飽受痕癢的煎熬，小則不能睡覺，也有人曾因此患上抑鬱症。MJ 水凝膠止癢敷料厚五毫米卻能高度透氣，不含藥性，為傷者帶來清涼水潤觸感，消除痕癢難當之苦。

Comprehensive Drug Enterprises Limited has always been active in the research and development of innovative novel drug delivery systems and medical devices. Within their product range, a new medical device - MJ Antipruritic Hydrogel patch combines several cutting-edge technologies to make the life of burn patients a lot easier. According to statistics, there are over 1 million burn patients in China every year. When subject to second or third degree burn or scald injuries, 90% of the victims will suffer from itchy skin in the process of scar formation. They might find it hard to fall asleep at night. Some of them might even feel depressed in extreme cases. The 5mm-thick MJ Antipruritic Hydrogel patch effectively eases itchiness with exceptional breathability. It feels cool and moist to the touch, while being completely drug-free.
