Able Trend 小小模塊應用達至無疆無界 A Small Box that Goes a Long Way

無線數據傳輸技術可以帶來很多令人意想不到的新體驗。就如這裡的圓型裝置，正是某名店的「宣傳大使」，內藏的 iBeacon 室內定位技術會向走近的顧客傳送最新優惠及產品資訊；榮通科技有限公司的業務就是設計、製造和銷售蘊含這種技術的模組，方便廠商套用在他們應用了 WiFi 或藍牙技術的產品上，而應用範圍更覆蓋計步器、心跳計，甚至可用於護老院以向有關職員遙距報告院友的狀況等。他們的模組產品已有相關認證，能讓客戶省卻電子產品認證的費用和時間。

Wireless data transfer technology has introduced us to unparalleled experiences that our former generations would never have imagined. Despite its nondescript shape, the round object on display here is the promotion ambassador of a prestigious international brand. It houses an iBeacon indoor positioning system that informs any customers who pass by of promotional offers and product details. Able Trend Technology Limited specializes in designing, manufacturing and marketing such wireless modules, as components to be incorporated in other WiFi or Bluetooth products such as pedometers, heart rate monitor, or even communication tools for remote reports in elderly homes. Their modules have acquired relevant certifications, saving clients the trouble and cost to certify their products.

* 成立於2011年的榮通科技有限公司，於2012年落戶科學園。如欲瀏覽更多資料，請掃描QR碼。

* Able Trend Technology Limited was founded in 2011, and moved their office to Hong Kong Science Park in 2012. More information is available by scanning the QR code.
