突破性CoC技術帶來超時代綠色光源

A Green Light Source with Revolutionary Chips on Cord Technology

超時代光源(集團)有限公司從事綠色科技，主要研發及生產各種LED燈及慳電膽等環保照明產品。Filament LED環保燈泡系列融入嶄新的Chips on Cord (CoC) 芯片技術，採用更精細原材料，佔用空間更小。其光源卻較一般鎢絲及LED燈泡更自然舒適及省電，比白熾燈泡省電十倍，節能效益達至歐洲標準的最高級別。突破性的CoC技術亦有助生產商輕易控制及更改燈泡的大小及形狀，使其體積及外型設計與慣常使用的燈泡無異。

Super Trend Lighting (Group) Limited specializes in green technologies, developing and manufacturing all kinds of eco-friendly lighting solutions such as LED lamps and CFL bulbs. Its Filament LED lamps series make use of revolutionary Chips on Cord (CoC) technology that uses finer materials taking up a lot less space to render light, which is more natural and comfortable than regular tungsten and LED bulbs. They also consume 10 times less energy than incandescent bulb and were awarded with the highest class in terms of energy efficiency by EU standard. CoC technology also lets the manufacturer easily change the sizes and shapes of the bulbs, so that Filament LED bulbs can directly replace incandescent bulbs without looking awkward in size or shape.

* 超時代光源(集團)有限公司成立於1987年，總部於2013年遷至科學園。如欲瀏覽更多資料，請掃描QR碼。
