## Aztech 極速有線上網 HomePlug無限方便 Wired Connectivity at Lightning Speed

益達系統(香港)有限公司推出的創新電子產品屢有技術及設計突破，就如這裡的HomePlug系列就是一例。HomePlug可藉著電線網絡傳送數據，用戶毋須鑽牆拉線，只要插上電源，接上網線即可穩定地上網，速度更作了1,200Mbps的突破，解決了無線訊號或受環境窒礙的弊病。Aztech的HomePlug有修長和帶三腳插座的設計，除可啟動WiFi功能，亦可當一般插座使用。

Aztech Systems (HK) Limited excels in innovative electronic products with groundbreaking design and cutting-edge technologies. One of its proud inventions is HomePlug that turns your in-house powerline into a networking infrastructure, conveniently covering dead spots without wire clutter or the need to drill walls. Just plug two or more HomePlugs into AC wall sockets and connect one of them to your modem router. You can then enjoy stable and speedy wired internet connection up to 1,200 Mbps from any other HomePlug. Certain models feature a slender design with a three-pin pass-through so that you can plug in another appliance. Other models also come with WiFi function to extend the reach of your wireless network.
