令黑客束手無策的檔案雄鷹 The Ultimate Information Security System Impervious to Hackers

一群從矽谷回流香港的資訊科技專家於2007年成立雲深系統有限公司，致力開發網絡及雲端數據保安系統。他們推出的「CONDOR PRIVACY PLATFORM」可說是滴水不漏的「檔案護衛」，因為它確保使用者永遠是檔案的主人，可主動地限制和更改收件者觀看的次數和時間，限制下載，甚至知道收件者何時觀看和看過的次數等。沒有CONDOR的程式和發件者的權限，任何人也不能打開文件，令用戶毋懼私密檔案遭外洩。

A group of IT professionals returned to Hong Kong from Silicon Valley in 2007 to found nwStor Limited, a company dedicated to developing network and cloud data security systems. Their latest product Condor Privacy Platform is an all-impervious file security guard. Only the owner of the file has full control on its access, such as restricting the number of retrievals and how much time other users can spend on it, prohibiting download, and even tracking when a recipient opens a file and how many times he/she has opened it. Without installing Condor and without the access granted by the sender, no one could open the attachment, thereby eliminating the risk of confidential files being disclosed to unauthorized persons.

* 雲深系統有限公司於2009年加入科學園，曾參與科技創業培育計劃。如欲瀏覽更多資料，請掃描QR碼。

* nwStor Limited has operated in Hong Kong Science Park since 2009, as a member of the Incu-Tech Programme. More information is available by scanning the QR code.
