小小盒子令單車變得更聰明 A Small Hub that Turns Your Bike Smart

ZeHus是一間意大利公司，他們發明了一項嶄新技術，能夠提高單車的性能和增加踩單車的樂趣，他們把這種科技命名「Bike+ all in one」，顧名思義，它可令人在踩單車時減少用力，即是把普通的單車變成「混能車」，以電力輔助，但所用的電池毋須另行充電，由系統自動調節，更可用藍牙技術配合智能手機的應用程式使用，是世界上獨具不用充電特性的「電動單車」，故此兩年來獲得多個環保和創新科技獎項。

ZeHus is based in Italy. Their cutting-edge technology “Bike+ all in one” turns regular bicycles into human-electric hybrid bikes and makes them more fun to ride. Bike+ offers assistance to the rider when needed, so that it takes less effort to bike. Though it is powered by electricity, no recharge is needed as it stores the energy when you brake or go downhill. It even connects with a smartphone app via Bluetooth for dashboard control and bike customization. This is the only non-plugin hybrid bike in the world and has won many awards for its achievement in environmental protection and innovation.

* ZEHUS成立於2013年，參加了科學園的「軟著陸計劃」。如欲瀏覽更多資料，請掃描QR碼。
* ZeHus was founded in 2013 and it is a member of HKSTP's Soft Landing Programme. More information is available by scanning the QR code.
