Job Responsibilities	Assist with daily needs of startup operation, including updating marketing materials, and managing clients relationship		
Skillset Requirements	- Organisation freak - Familiar with tools like Notion		

Software Engineer Intern (Frontend)

Alphabag

Reference No.	YSIP003		
Company Profile	Alphabag is a project management platform designed for the creative industry, combining artificial intelligence with tangible game cards to simplify project planning and execution, enhancing collaboration efficiency. Unlike other SaaS solutions, Alphabag Deck is a set of 128 physical cards, each resembling Pantone color cards and detailing common processes. Users can gamify project workflows in face-to-face communication, significantly reducing communication costs. With the Alphabag App, outcomes from physical discussions seamlessly integrate into the application. The integration of virtual and physical features sets Alphabag apart, providing an engaging and efficient project management experience for creative teams. Join us in redefining project management with the innovation of Alphabag!		
Company Website	http://alphabag.com	Application & Enquiries	kevin@alphabag.com
Job Function	Technical	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Join our dynamic team as a Software Engineer Intern (Frontend) and contribute to the development of cross-platform mobile applications using the Flutter framework. As an intern, you will collaborate with experienced engineers to create engaging user interfaces, troubleshoot issues, and optimize application performance. Additionally, you'll play a crucial role in building a browser extension, expanding your skills in both mobile and web development. This internship offers a hands-on experience to enhance your proficiency in frontend technologies, teamwork, and problem-solving. If you're passionate about creating seamless user experiences across different platforms, we welcome you to be part of our innovative software development journey.		
Skillset Requirements	• Proficiency in Flutter framework for mobile application development • Strong understanding of frontend technologies, including HTML, CSS, and JavaScript • Experience in building responsive and user-friendly interfaces • Basic knowledge of browser extension development		

	• Familiarity with version control systems (e.g., Git)
	• Ability to collaborate in a team environment and adapt to fast-paced development cycles
	• Eagerness to learn and stay updated on emerging technologies
	• Good problem-solving and analytical skills
	• Effective communication and interpersonal abilities
	• Enthusiasm for contributing to innovative software projects

Software Engineer Intern (Backend)

Alphabag

Reference No.	YSIP004		
Company Profile	Alphabag is a project management platform designed for the creative industry, combining artificial intelligence with tangible game cards to simplify project planning and execution, enhancing collaboration efficiency. Unlike other SaaS solutions, Alphabag Deck is a set of 128 physical cards, each resembling Pantone color cards and detailing common processes. Users can gamify project workflows in face-to-face communication, significantly reducing communication costs. With the Alphabag App, outcomes from physical discussions seamlessly integrate into the application. The integration of virtual and physical features sets Alphabag apart, providing an engaging and efficient project management experience for creative teams. Join us in redefining project management with the innovation of Alphabag!		
Company Website	http://alphabag.com	Application & Enquiries	kevin@alphabag.com
Job Function	Technical	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Join our team as a Software Engineer Intern (Backend) and play a key role in developing cloud functions to enhance the functionality of our product. As an intern, you'll be involved in planning and implementing the integration of various LLMs (Large Language Models) into our software. Collaborate with experienced engineers to design and optimize backend processes, ensuring scalability and efficiency. This internship provides a unique opportunity to gain hands-on experience in cloud computing, backend development, and machine learning integration. If you're passionate about backend technologies and excited to contribute to cutting-edge projects, join us for a challenging and rewarding internship.		
Skillset Requirements	• Proficiency in backend development languages such as Python, Java, or Node.js • Experience with cloud computing platforms, particularly in writing cloud functions • Understanding of database systems and data modeling • Familiarity with RESTful API design and implementation • Basic knowledge of machine learning concepts and the ability to integrate LLMs into applications • Strong problem-solving and analytical skills • Collaboration and communication skills to work effectively in a team • Eagerness to learn and adapt to new technologies		

	• Familiarity with version control systems (e.g., Git) • Enthusiasm for contributing to innovative software solutions

Project Coordinator

Velenova limited

Reference No.	YSIP027		
Company Profile	Velenova is a company deeply embedded in developing RF and Microwave Measurement Solutions by delivering systems and products to customers operating in the areas of 5G/6G communication, Satellites, Automotive and Vehicle, Wireless and EMC. Our well-known experts are dedicated to delivering superior engineering solutions for applications such as production line or general automated component testing.		
Company Website	Velenova limited	Application & Enquiries	qwlin@velenova.com.hk
Job Function	Business	Number of Vacancy	1
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	- Project Organization: Assist in the definition of project scope and objectives, involving all relevant stakeholders and ensuring technical feasibility. - Documentation: Maintain comprehensive project documentation, plans, and reports. - Communication: Ensure that all project information is appropriately documented and secured. - Time Management: Monitor project progress and handle any issues that arise — act as the point of contact and communicate project status to all participants.		
Skillset Requirements	- Bachelor's degree in business or related field of study. - Good verbal, written, and presentation skills. - Ability to work effectively both independently and as part of a team. - Competency in Microsoft applications including Word, Excel, and Outlook. - Knowledge of project management software tools, methodologies, and best practices. - Excellent analytical and problem-solving abilities.		

Testing Engineer

Velenova limited

Reference No.	YSIP028
Company Profile	Velenova is a company deeply embedded in developing RF and Microwave Measurement Solutions by delivering systems and products to customers operating in the areas of 5G/6G communication, Satellites, Automotive and Vehicle, Wireless and EMC. Our well-known experts are dedicated to delivering superior engineering solutions for applications such as production line or general automated component testing.

Company Website	Velenova limited	**Application & Enquiries**	qwlin@velenova.com.hk
Job Function	Technical	**Number of Vacancy**	1
Working Mode	Full-time	**Work Location**	Science Park

Job Responsibilities	- Product Testing: Execute detailed testing plans for a variety of products to ensure they meet all specifications and quality standards. - Test Development: Design and develop testing processes and perform repetitive testing to identify potential issues with product performance. - Technical Analysis: Conduct rigorous analysis during testing phases to ensure products adhere to specifications and industry standards. - Troubleshooting: Identify, diagnose, and resolve product issues during the testing phase, providing detailed reports and recommendations for product enhancement. - Documentation: Maintain accurate records of testing procedures, methodologies, and results, ensuring documentation is up-to-date and compliant with company policies.
Skillset Requirements	- Bachelor's degree in Electrical Engineering, RF Engineering, or a related field. - Proven experience in product testing, particularly within the RF or Microwave field. - Strong understanding of RF engineering principles and testing methodologies. - Familiarity with RF measurement instruments such as spectrum analyzers, network analyzers, and signal generators. - Excellent analytical and problem-solving skills, with a keen eye for detail. - Ability to perform repetitive tasks with precision and consistency. - Strong communication and documentation skills.

AIGC engineer Intern

Xoocity Meta Technology Ltd.

Reference No.	YSIP029		
Company Profile	XOOCITY is the first virtual land ownership platform of a replica mega city Hong Kong metaverse, allowing users to sell, stake, and develop NFT-based applications on it. XOOCITY replicates real cities to create a virtual world for visitors touring on attractions, skyscrapers, amusement parks, temples, landscapes as well as shops and trade expos.		
Company Website	www.xoocity.com	Application & Enquiries	info@xoocity.com
Job Function	Technical	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	Develop, train, and optimize AI models, particularly in the domain of ChatGPT and conversational AI. Collaborate with data scientists to preprocess and analyze data, ensuring its quality and relevance for model training. Implement and enhance existing AI algorithms and models to improve performance, accuracy, and efficiency. Conduct research and stay up to date with the latest advancements in AI, natural language processing (NLP), and related fields. Evaluate and integrate third-party AI tools, frameworks, and libraries to enhance system capabilities. Collaborate with software engineers to integrate AI models into production systems and ensure their scalability and reliability. Participate in code reviews, testing, and debugging to ensure the quality of AI models and associated software components. Develop and maintain technical documentation, including model architecture, algorithms, and implementation details. Collaborate with product managers and stakeholders to understand requirements and translate them into technical solutions.		
Skillset Requirements	Bachelor's or master's degree in computer science, engineering, or a related field (or equivalent practical experience). Strong programming skills in languages such as Python, Java, or C++. Solid understanding of machine learning principles and algorithms, with hands-on experience in developing AI models. Familiarity with AI frameworks and libraries such as TensorFlow, PyTorch, or scikit-		

	learn. Experience in natural language processing (NLP) techniques and frameworks for text-based AI applications. Knowledge of deep learning architectures and their practical implementation. Ability to preprocess and analyze data using Python libraries like numpy, pandas, or NLTK. Experience with software development practices, including version control (e.g., Git) and agile methodologies. Strong problem-solving skills and the ability to debug and troubleshoot complex AI systems. Excellent communication and collaboration skills, with the ability to work effectively in cross-functional teams.

Metaverse UE/UI designer

Xoocity Meta Technology Ltd.

Reference No.	YSIP030
Company Profile	XOOCITY is the first virtual land ownership platform of a replica mega city Hong Kong metaverse, allowing users to sell, stake, and develop NFT-based applications on it. XOOCITY replicates real cities to create a virtual world for visitors touring on attractions, skyscrapers, amusement parks, temples, landscapes as well as shops and trade expos.

Company Website	www.xoocity.com	**Application & Enquiries**	info@xoocity.com
Job Function	Technical	**Number of Vacancy**	1
Working Mode	Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	Responsibilities: Design intuitive and engaging user experiences within virtual environments, considering user behaviors, needs, and preferences. Create user flows, wireframes, and interactive prototypes to guide the development of Metaverse applications. Design and create 3D assets, environments, and characters using industry-standard tools and techniques. Optimize 3D assets for real-time rendering and ensure high visual quality and performance. Collaborate with developers to implement interactive elements and behaviors in the Metaverse. Stay informed about the latest trends, technologies, and best practices in Metaverse design and user experience. Conduct user research and usability testing to gather feedback and iterate on design concepts. Collaborate closely with artists, developers, and other stakeholders to ensure seamless integration of design elements. Present design ideas and concepts to internal teams and clients, effectively communicating design rationale and benefits. Continuously iterate on designs based on feedback, user testing results, and evolving project requirements.
Skillset Requirements	Bachelor's degree in design, computer science, or a related field (or equivalent practical experience). Strong portfolio demonstrating expertise in Metaverse design, including user experience, 3D asset creation, and interactive design. Proficiency in 3D modeling and design software such as Blender, Maya, or 3ds Max.

	Solid understanding of user-centered design principles and methodologies. Basic scripting and programming skills, preferably in languages such as C#, JavaScript, or Python. Familiarity with game development frameworks or engines like Unity or Unreal Engine. Experience with virtual reality (VR) and augmented reality (AR) technologies and their application in the Metaverse. Excellent collaboration and communication skills, with the ability to work effectively in multidisciplinary teams. Strong problem-solving skills and attention to detail. Adaptability and willingness to learn and explore new tools, technologies, and design trends.

Software Engineer (AI / IIoT)

WITTI Technology Limited

Reference No.	YSIP031
Company Profile	WITTI Technology Limited stands at the forefront of the Industrial Internet of Things (IoT) and Visual Artificial Intelligence, specializing in assisting Food & Beverage (F&B) manufacturing facilities to transition to Industry 4.0 standards. Our WITTI Smart Manufacturing System (SMS) integrates proprietary IIoT sensors and software onto production floors, enabling the automatic gathering of real-time production data, AI assisted visual quality assurance checks, material traceability, and HACCP-compliant documentation. By providing F&B factory management with a clear visualization of their facility's status, we enable them to enhance efficiency, minimize labor, and consistently uphold superior quality standards.

Company Website	https://www.wittisms.com	**Application & Enquiries**	alfred.wong@wittisms.com
Job Function	R&D	**Number of Vacancy**	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	You will be working on: 1. Participate in the design and development of WITTI Smart Manufacturing System, our SaaS IIoT platform 2. Develop AI and machine learning models for food quality and safety monitoring 3. Develop front-end app and web based platform 4. Work with IoT devices, SoC (system on chips), various sensors
Skillset Requirements	Skillsets needed: 1. Hands on experience in ReactJS and React Native on both web and mobile app developments 2. Experience in HTML, CSS and JavaScript 3. Experience in JAVA programming 4. Experience in database programming with MySQL or similar database engine 5. Basic machine learning knowledge or implementation experience is preferred but not essential

Match Limited

Reference No.	YSIP060		
Company Profile	At Match, we are on a mission to transform the design landscape by facilitating seamless collaboration and empowering designers to bring their visions to life effortlessly. Our platform leverages the power of AI to provide valuable assistance to designers through insightful surveys and intuitive keyword visualization, enabling effective communication and a deep understanding of project requirements. We understand the importance of inspiration in the design journey, which is why we curate a rich collection of resources and foster a vibrant community that fuels creativity and pushes boundaries. By carefully matching clients with the most suitable designers, we ensure exceptional experiences that make a lasting impact. Together, let's embark on a journey of design innovation, unlocking limitless possibilities and shaping a future where creativity knows no bounds.		
Company Website	https://matchhk.co/	Application & Enquiries	info@matchhk.co
Job Function	Technology	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	- Collaborate to optimize input prompts for high-quality AI model outputs - Analyze AI model capabilities and limitations to design effective prompts - Conduct research and experiments to enhance prompt engineering techniques - Generate diverse and accurate responses by manipulating prompts - Create guidelines for prompt engineering and ensure consistent AI model performance - Collaborate to leverage relevant datasets for prompt improvement - Stay updated with AI prompt engineering advancements and contribute to the field - Document and communicate prompt engineering strategies, findings, and recommendations		
Skillset Requirements	- Bachelor's/Master's degree in Computer Science, AI, or related field - Strong understanding of NLP, machine learning, and AI model architectures - Proficiency in Python and relevant libraries (e.g., TensorFlow, PyTorch) - Familiarity with prompt engineering and its impact on AI model performance - Excellent problem-solving and communication skills - Self-motivated and able to work independently - Research experience and publications in AI prompt engineering are a plus		

Digital Marketing Specialist

Match Limited

Reference No.	YSIP061

Job Function	Technology	Number of Vacancy	1
Working Mode		Work Location	Science Park
Job Responsibilities	- Develop and implement NLP models for keyword extraction from text. - Utilize NLP techniques such as tokenization, Part-of-Speech (POS) tagging, and Named Entity Recognition (NER). - Collaborate with the data science team to improve the accuracy and efficiency of keyword extraction. - Conduct research on the latest NLP techniques and apply them to our projects.		
Skillset Requirements	Bachelor's/Master's degree in Computer Science, AI, or related field Strong understanding of NLP, machine learning, and AI model architectures Proficiency in Python and relevant libraries (e.g., TensorFlow, PyTorch) Familiarity with prompt engineering and its impact on AI model performance Excellent problem-solving and communication skills Self-motivated and able to work independently Research experience and publications in AI prompt engineering are a plus		

Robotic R&D Engineer Intern

Aishang Mobility (Hong Kong) Limited

Reference No.	YSIP063
Company Profile	AiShang Mobility (Hong Kong) Limited (AiShang Mobility) aims at becoming the WORLD'S LEADING SMART PATROL ROBOT COMPANY. Aspiring to enhance the proprietary robotic technologies established by its sister company, Beijing AIMO 爱上智能(www.aimo.tech) who is owned and managed by the same founders, AiShang Mobility is setting up its global headquarter in Hong Kong to develop high quality smart patrol robotic solutions with emphasis on outdoor applications under the brand of AIMO for international markets.

Company Website	http://www.aimo.ai	Application & Enquiries	kennywong@aimo.ai
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	1. Based on market requirements, using the latest robotic and artificial intelligent technologies to develop solutions for different industry applications, especially for security patrolling industry. 2. Research the latest technologies and create new solutions for new applications. 3. Conduct testing and validation of solutions in the lab or at customer site. 4. Provide technical solutions to field engineering for resolving technical problems with customer projects. 5. Work with the China team to co-develop productions and solutions for both Hong Kong and international markets. 6. Provide deployment engineering support for customer contracts. 7. Resolve technical issues with customers either remotely or on-site. 8. Collaborate on site surveys and planning for customer deployments, ensuring optimal project execution.		
Skillset Requirements	• Experience and knowledge in robotic and auto driving. • Experience and knowledge in AI is an advantage • Creative minded, able to research different technologies and come up with up with technical solutions. • Good writing, presentation, communication and analytical skills • Passionate, self-motivated, good teamwork spirit, able to work under pressure and		

	meet tight deadlines • Willing to work in a flexible schedule when needed.

Project Engineering Management Intern

Kodifly Limited

Reference No.	YSIP064		
Company Profile	Kodifly specializes in advanced spatial intelligence and transport infrastructure monitoring. We focus on creating real-time digital twins using cutting-edge LiDAR technology, delivering actionable insights for infrastructure challenges like deformation, landslides, and vegetation encroachment through precise 3D point cloud processing. Our solutions prioritize the safety and longevity of essential transport infrastructure such as airports, railways, and highways, emphasizing climate resilience.		
Company Website	https://kodifly.com	Application & Enquiries	henry@kodifly.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	- Assisting in onsite engineering tasks and project management activities. - Conducting site surveys and data collection using advanced engineering tools. - Collaborating with the engineering team on infrastructure monitoring and analysis. - Expected documentation includes system design and testing report.		
Skillset Requirements	Technical Knowledge: Basic understanding of engineering principles and tools. Project Management: Familiarity with project coordination and time management. Team Collaboration: Effective communication and teamwork skills. Analytical Thinking: Ability to analyze data and problem-solve. Documentation Proficiency: Skills in creating technical reports and system documentation. Attention to Detail: Precision in data collection and analysis. Adaptability: Quick learning and flexibility in a dynamic work environment. Educational Background: Pursuing or completed studies in engineering or a related field.		

Marketing Intern

Kodifly Limited

Reference No.	YSIP065
Company Profile	Kodifly specializes in advanced spatial intelligence and transport infrastructure monitoring. We focus on creating real-time digital twins using cutting-edge LiDAR technology, delivering actionable insights for infrastructure challenges like deformation, landslides, and vegetation encroachment through precise 3D point cloud processing. Our solutions prioritize the safety and longevity of essential transport infrastructure such as airports, railways, and highways, emphasizing climate resilience.

Company Website	https://kodifly.com	**Application & Enquiries**	henry@kodifly.com
Job Function	Business	**Number of Vacancy**	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	1. Assisting in the development and execution of marketing campaigns. 2. Conducting market research to identify trends and opportunities. 3. Supporting social media management and content creation. 4. Expected impact includes increased brand awareness and engagement.
Skillset Requirements	Marketing Knowledge: Basic understanding of marketing principles and strategies. Content Creation: Skills in creating engaging marketing content, such as social media posts, blogs, or newsletters. Analytical Skills: Ability to analyze market trends and customer feedback. Digital Proficiency: Familiarity with digital marketing tools and platforms. Creativity and Innovation: Creative thinking for developing new marketing ideas. Communication Skills: Strong written and verbal communication abilities. Teamwork: Capability to collaborate effectively with the marketing team. Adaptability: Flexibility to adapt to different marketing channels and strategies. Educational Background: Pursuing or completed a degree in marketing, business, or a related field.

Video/Animation Intern

Kodifly Limited

Reference No.	YSIP066
Company Profile	Kodifly specializes in advanced spatial intelligence and transport infrastructure monitoring. We focus on creating real-time digital twins using cutting-edge LiDAR technology, delivering actionable insights for infrastructure challenges like deformation, landslides, and vegetation encroachment through precise 3D point cloud processing. Our solutions prioritize the safety and longevity of essential transport infrastructure such as airports, railways, and highways, emphasizing climate resilience.

Company Website	https://kodifly.com	**Application & Enquiries**	henry@kodifly.com
Job Function	Others (e.g Design, Finance, etc.)	**Number of Vacancy**	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	- Developing animation and video content using Blender for digital marketing and technical materials. - Assisting in creating visualizations and simulations for infrastructure projects. - Collaborating on multimedia content for social media, website, and client presentations. - Expected impact includes enhanced interactive and visual communication of complex concepts.
Skillset Requirements	Blender Expertise: Proficiency in Blender for animation and video production. Technical Visualization: Ability to create simulations and visualizations for technical content. Multimedia Content Creation: Skills in developing content for social media, websites, and presentations. Creative Communication: Talent in visually conveying complex concepts in an engaging manner. Team Collaboration: Effective teamwork and coordination skills. Attention to Detail: Strong focus on detail in animation and video quality. Adaptability: Flexibility in style and approach to suit various project needs.

Graphic Design Intern

Kodifly Limited

Reference No.	YSIP067
Company Profile	Kodifly specializes in advanced spatial intelligence and transport infrastructure monitoring. We focus on creating real-time digital twins using cutting-edge LiDAR technology, delivering actionable insights for infrastructure challenges like deformation, landslides, and vegetation encroachment through precise 3D point cloud processing. Our solutions prioritize the safety and longevity of essential transport infrastructure such as airports, railways, and highways, emphasizing climate resilience.

AI Data Processing Assistant

Glassbox AI

Reference No.	YSIP075		
Company Profile	At Glassbox AI, our primary focus is on serving industries subject to regulatory oversight, offering them cutting-edge ethical AI solutions. Our proprietary Explainable AI technology plays a pivotal role in our mission, shedding light on intricate black-box AI models, rendering them comprehensible and accountable. This innovation is especially critical in addressing the global demand for transparency and trust in AI systems.		
Company Website	xai.hk	Application & Enquiries	tim.lo@xai.hk
Job Function	Science	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	- Work in part-time or full-time - Assist in processing data for AI models/algorithms to meet specific requirements on various types of data (including but not limited to numerical/tabular data, images, videos and English/Chinese text) - Perform dataset cleaning, pre-processing and organization on specific data formats - Perform data annotation and labeling for model training - Conduct data validation and refinement to ensure data consistency and accuracy		
Skillset Requirements	Ability to communicate effectively with team members and stakeholders. - Clear communication in English and Chinese, as specified in the job requirements. -Critical thinking for refining and validating data to ensure accuracy. -Proficiency in relevant tools and software for video processing and annotation		

AI Developer

One Financial Technology Limited

Reference No.	YSIP076
Company Profile	ONEFi is an award-winning AI-based financial management platform that leverages cutting-edge AI technology to streamline the distribution, onboarding, and settlement of clients' financial instructions.

Company Website	www.onefi.io	**Application & Enquiries**	edwin.l@onefi.io
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Part-time	**Work Location**	InnoCentre

Job Responsibilities	1. Develop and implement AI models and algorithms to solve complex business problems. 2. Design and build scalable AI systems that can process and analyze large datasets. 3. Collaborate with data scientists, software engineers, and product managers to understand project requirements and deliver AI solutions. 4. Conduct research and stay up-to-date with the latest advancements in AI technologies and methodologies. 5. Evaluate and select appropriate AI frameworks, libraries, and tools to support development efforts. 6. Optimize AI models for performance, scalability, and efficiency. 7. Perform testing and debugging of AI solutions to ensure accuracy and reliability. 8. Document and communicate AI solutions, methodologies, and best practices to technical and non-technical stakeholders. 9. Stay informed about data privacy and security regulations to ensure compliance in AI development.
Skillset Requirements	1. Bachelor's or Master's degree in Computer Science, Engineering, or a related field. 2. Solid understanding of machine learning algorithms and techniques. 3. Proficiency in programming languages such as Python, Java, or C++. 4. Experience with AI frameworks and libraries (e.g., TensorFlow, PyTorch, scikit-learn). 5. Strong knowledge of data structures, algorithms, and statistical concepts. 6. Familiarity with big data technologies and distributed computing frameworks (e.g., Hadoop, Spark) is a plus. 7. Experience in developing and deploying AI models in cloud environments (e.g., AWS, Azure, Google Cloud) is preferred. 8. Excellent problem-solving skills and ability to work on complex projects with minimal supervision.

	9. Strong communication and collaboration skills to effectively work in a cross-functional team. 10. Demonstrated ability to adapt to new technologies and learn quickly in a fast-paced environment.

Backend Developer

One Financial Technology Limited

Reference No.	YSIP77
Company Profile	ONEFi is an award-winning AI-based financial management platform that leverages cutting-edge AI technology to streamline the distribution, onboarding, and settlement of clients' financial instructions.

Company Website	www.onefi.io	**Application & Enquiries**	edwin.l@onefi.io
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Part-time	**Work Location**	InnoCentre

Job Responsibilities	1. Design, develop, and maintain the server-side architecture and APIs of our applications. 2. Collaborate with frontend developers, product managers, and other stakeholders to understand project requirements and translate them into scalable backend solutions. 3. Develop and integrate databases and data storage solutions to support efficient data retrieval and manipulation. 4. Write clean, efficient, and maintainable code that follows best practices and coding standards. 5. Implement security and data protection measures to ensure the integrity and confidentiality of user data. 6. Optimize application performance and scalability through efficient database queries, caching mechanisms, and server-side optimizations. 7. Identify and troubleshoot issues, perform debugging, and conduct thorough testing to ensure the reliability and stability of the backend systems. 8. Collaborate with DevOps and infrastructure teams to deploy and maintain backend services and infrastructure in a cloud environment.
Skillset Requirements	1. Bachelor's or Master's degree in Computer Science, Software Engineering, or a related field. 2. Strong proficiency in backend programming languages such as Java, Python, Ruby, or Node.js. 3. Experience with backend frameworks and technologies (e.g., Spring Boot, Django, Ruby on Rails, Express.js). 4. Solid understanding of database systems (relational and/or NoSQL) and experience with query optimization and database design. 5. Knowledge of RESTful API design principles and experience in building and consuming APIs.

	6. Familiarity with version control systems (e.g., Git) and collaborative development workflows (e.g., Agile, Scrum). 7. Experience with cloud platforms (e.g., AWS, Azure, Google Cloud) and knowledge of deploying and scaling applications in a cloud environment. 8. Strong problem-solving skills and ability to analyze and debug complex backend issues. 9. Excellent communication and collaboration skills to work effectively in a team environment. 10. Ability to work independently, prioritize tasks, and meet project deadlines.

Software Developer (M/F/D)

Expando

Reference No.	YSIP078
Company Profile	Founded in 2021 in Hong Kong, Expando is an award-winning startup backed by leading incubation program Hong Kong Science Park and Technology. Expando is Asia's leading end-to-end Partner Relationship Management SaaS, bringing automation and gamification to optimize performance of resellers and independent sales professionals. With a team of 5 full-time members from 5+ countries, Expando is on a journey to change the way technology companies test and grow their ventures in new markets. Discover our company values on https://www.expando.world/careers

Company Website	https://expando.ai/	**Application & Enquiries**	careers@expando.world
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	**Work Location**	Hybrid (Remote 3 days, On-site 2 days)

Job Responsibilities	We are seeking a talented student to join our team as a Software Developer at Expando. During this internship, you will work together with a team of 2-3 team members. Some responsibilities will include: - Developing front-end/back-end application - Creating servers and databases for functionality (DevOps) - Ensuring responsiveness of applications - Working alongside UI/UX designers for web design features - Seeing through a project from conception to finished product - Designing and developing APIs - Meeting both technical and consumer needs Responsibilities will be adjusted according to abilities.

Skillset Requirements	The student software engineer has a strong interest for both technology and its applications to solving real-world use cases: - Bachelor's degree in Computer Science or any related field - Experience in any of the following: Python, ReactJS, NextJS, NodeJS, Go, and/or Dino - Familiarity with either MySQL, SQLite, Postgres, DynamoDB, and/or Docker - Experience in side projects/open-source projects - Good verbal and written communication skills in English - Good attention to detail and excellent problem-solving skills

Product Design Lead (M/F/D)

Expando

Reference No.	YSIP079		
Company Profile	Founded in 2021 in Hong Kong, Expando is an award-winning startup backed by leading incubation program Hong Kong Science Park and Technology. Expando is Asia's leading end-to-end Partner Relationship Management SaaS, bringing automation and gamification to optimize performance of resellers and independent sales professionals. With a team of 5 full-time members from 5+ countries, Expando is on a journey to change the way technology companies test and grow their ventures in new markets. Job Function	Business	Number of Vacancy	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	• Designing, developing, and implementing generative AI models and algorithms utilizing state-of-the-art techniques such as GPT, VAE, and GANs. • Collaborating with cross-functional teams to define AI project requirements and objectives, ensuring alignment with overall business goals. • Conducting research to stay up-to-date with the latest advancements in generative AI, machine learning, and deep learning techniques and identify opportunities to integrate them into our products and services. • Optimizing existing generative AI models for improved performance, scalability, and efficiency. • Developing and maintaining AI pipelines, including data preprocessing, feature extraction, model training, and evaluation. • Developing clear and concise documentation, including technical specifications, user guides, and presentations, to communicate complex AI concepts to both technical and non-technical stakeholders. • Contributing to the establishment of best practices and standards for generative AI development within the organization.		

Skillset Requirements	• No working experience is required but need to demonstrate strong programming capabilities through projects and awards. • Knowledge in Python • Comfortable with reading academic papers • Familiar with AWS console environment • Fast Learner - you will be constantly learning new frameworks and languages • Great problem solver – you will encounter challenges when using new technologies • A can-do attitude and diligence • Good communication skill • Major in STEM-related • Experience in competitive programming is a plus

Software Engineer Internship

Scan the World Limited

Reference No.	YSIP084
Company Profile	Scan the World is a virtual solutions company. We focus on creating interactive photorealistic worlds based on real locations. These digital twins are used in education, eCommerce, tourism and more!

Company Website	scan-the-world.com	**Application & Enquiries**	info@scantheworldproject.com
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	We are looking for a talented Web Developer to join us, the A-Team, building web-based tools for digital content creation in the virtual domain. You will report to Technical Leads and Subject Matter Experts to lead the development of web-based user facing toolsets, new features and bug fixes. Our ideal candidate is, like us, passionate about building amazing tools in a collaborative environment with a team of enthusiastic developers.
Skillset Requirements	Candidates must be pursuing tertiary education in a related field from an institution in Hong Kong.

Have working knowledge of front-end web technology (javascript, typesrcipt, web components, css, html - three.js would be a bonus)

Have experience in object-oriented design and implementation

Have experience with UI and data management experience with server side software |

Social Media Intern

Scan the World Limited

Reference No.	YSIP085		
Company Profile	Scan the World is a virtual solutions company. We focus on creating interactive photorealistic worlds based on real locations. These digital twins are used in education, eCommerce, tourism and more!		
Company Website	scan-the-world.com	Application & Enquiries	info@scantheworldproject.com
Job Function	Business	Number of Vacancy	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	We are looking for a creative and strategic Social Media Intern to join our dynamic team at Scan the World. The ideal candidate will be responsible for mapping out, planning, and executing an effective social media strategy that aligns with our brand's vision and goals. We are seeking a highly dynamic and vibrant individual to join our fast-paced, innovative environment. Collaborate closely with our in-house teams to develop and implement a comprehensive social media strategy. Coordinate with creatives to maintain a consistent brand narrative. Assist in creating and scheduling engaging content. Brainstorm innovative ideas and monitor social media channels. Analyze campaign performance and optimize strategies. Work with various departments to ensure brand consistency and stay updated on social media trends.		
Skillset Requirements	Candidates must be pursuing tertiary education in a related field from an institution in Hong Kong. Preferred qualifications include experience in marketing, communications, or a related field, with a focus on social media. Demonstrated expertise in social media management, content creation, and digital marketing is essential. Proficiency in social media platforms and analytics tools is expected. Strong communication, collaboration, creativity, organization, and time-management skills are required. Knowledge of graphic design principles is advantageous.

Skillset Requirements	- Experience in relevant areas (Computer science, Data science, Software Engineering, ...), specifically with skills in data science, machine learning and AI. - Knowledge and skills in coding language e.g. Kotlin, Swift - Familiarity with AI platforms/environments e.g. TensorFlow, Pytorch		

Web Developer/ Software Engineer

DataLouder Company Limited

Reference No.	YSIP096		
Company Profile	DataLouder Company Limited is a fast-growing fintech company under HKSTP Incubation. We aim to become the largest information platform in the APEC financial services market to bridge the gap between retail investors and financial services providers. DataLouder's flagship product is a platform that uses AI-powered recommendation algorithms to match retail investors with financial services providers. The platform collects users' investment objectives, risk appetite, and other relevant information by ChatGPT and continues to update based on user behaviors. Meanwhile, using data extraction and NLP techniques, the platform collects and evaluates the service providers' quality from different perspectives, including popularity, user feedback, reputation, and investment strategies. Based on these data, the platform provides personalized investment recommendations from a range of financial services providers, including investment advisors, robo-advisors, and brokers. The platform also offers tools and features that enable users to track their investment portfolio and monitor their performance.

Reference No.	YSIP101
Company Profile	Petionship is an all-in-one solution powered by Artificial Intelligence and Big Data with the vision to digitize every pet shop with cutting-edge technologies. With Petionship's self-developed industry first AI infrastructure PetAI, Petionship aims to revolutionize pet businesses' daily vital operations, and build a data-driven pet product supply chain, pet business operating system and a digital global ecosystem for the whole pet care industry, with different digital products tackling different pain points for our pet shop clients.

Company Website	https://www.petionship.com	**Application & Enquiries**	hr@petionship.com
Job Function	Business	**Number of Vacancy**	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	Petionship is looking for a digital marketing intern who loves pets and tech! Do you love pets as much as we do? Do you want to use your digital marketing skills to make a positive impact on the lives of millions of pets and their owners? Do you want to learn from the best in the pet tech industry and grow your career? If yes, then you might be the perfect fit for our digital marketing intern position! Role and Responsibilities - Create and manage engaging and fun social media campaigns across various platforms (Facebook, Instagram, LinkedIn, Twitter, etc.) that showcase our products and services for pet businesses - Develop and execute content strategies for our website, blog, newsletter, and other channels that inspire our audience about the latest trends and innovations in the pet care industry - Monitor and report on the performance of our digital marketing efforts
Skillset Requirements	- Be a current student majoring in digital marketing, social media, new media, or related fields - Have excellent written and verbal communication skills in English - Have a strong interest of the pet care industry and a genuine love for pets of all kinds - Have experience or skills in using various digital marketing tools and platforms - Be creative, proactive, and eager to learn new things

Digital Art Education Intern

Artbat Live Limited

Reference No.	YSIP102		
Company Profile	ARTBAT LIVE is an art tech platform that organise digital art battles through Esport and live streaming technologies and utilise art tech technologies to power digital artists.		
Company Website	https://www.artbatlive.com	Application & Enquiries	mike@artbatlive.com
Job Function	Others (e.g Design, Finance, etc.)	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	To join a curriculum development team, we create a comprehensive and effective learning experience for our students. We need an intern to assist to develop our curriculum, assist teaching in the classrooms, and help us in the creation of marketing materials and develop art syllabus.		
Skillset Requirements	• Expertise in Procreate software • Ability to draw digital art , understand graphic design and illustration • The ideal candidate should be patient and have teaching experience are preferred		

Augmented Reality Developer Intern

Artbat Live Limited

Reference No.	YSIP103
Company Profile	ARTBAT LIVE is an art tech platform that organise digital art battles through Esport and live streaming technologies and utilise art tech technologies to power digital artists.

Company Website	https://www.artbatlive.com	**Application & Enquiries**	mike@artbatlive.com
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Full-time	**Work Location**	Science Park

Job Responsibilities	• Perform system design, system development web based application • Deploy Web AR technology and test on a wide range of product • Tackle program bug and troubleshooting issues • Prepare test cases and perform unit testing • Research on AI generative art in web AR environment
Skillset Requirements	• Currently enrolled in a Bachelor's degree program in Computer Science, Software Engineering, or a related field. • Strong foundation in augmented reality concepts and technologies. • Familiarity with Unity or Unreal Engine (preferred). • Proficient programming skills in C#, C++, or JavaScript. • Excellent problem-solving and debugging abilities. • A passion for creativity and a desire to bring art to life through technology.

Digital Marketing Interns

Artbat Live Limited

Reference No.	YSIP104		
Company Profile	ARTBAT LIVE is an art tech platform that organise digital art battles through Esport and live streaming technologies and utilise art tech technologies to power digital artists.		
Company Website	https://www.artbatlive.com	Application & Enquiries	mike@artbatlive.com
Job Function	Business	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	• Manage our online presence and social media accounts including Discord • Assist the core team to executive marketing, email, social media, and display advertising campaigns. • Participate in brainstorming sessions with the core team to generate creative ideas and promotional strategy • Optimize social media content for various digital platforms;		
Skillset Requirements	• Able to deliver photos and creative video output are preferred • Possess creative and good problem-solving skills • Experience on the following platforms: Discord, TikTok, Instagram would be a big plus.		

Backend Developer Intern

Moon Lab Academy Limited

Reference No.	YSIP105
Company Profile	Moon Lab Academy was founded in 2022 in the beginning of the hype cycle for blockchain and Web3 technologies. During that time, we identified the need in the industry for a technology provider that has the capability to build and deploy Web3 applications. We are developing a no-code or low-code application builder that makes it easy for businesses of all sizes to create and deploy blockchain applications. Our platform allows experienced web3 developers to publish smart contracts and turn them into standard APIs, which means that anyone can use our APIs to enjoy the benefits of blockchain technology, regardless of their coding skills in the blockchain. We reward contributors of smart contracts based on usage, incentivizing the creation of high-quality, widely-used smart contracts. We are committed to making blockchain technology more accessible to everyone, and we believe that our platform will help to promote mass adoption of this revolutionary technology.

Company Website	https://moonlab-plux.netlify.app/	**Application & Enquiries**	elvis@themoonlab.co
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Full-time	**Work Location**	Science Park
Job Responsibilities	We are looking for an analytical, results-driven back-end developer who will work with team members to troubleshoot and improve current back-end applications and processes. You will use your understanding of programming languages and tools to analyze current codes and industry developments, formulate more efficient processes, solve problems, and create a more seamless experience for users. You should have excellent communication, computer, and project management skills. ● Database design and management (SQL or NoSQL) ● Creating APIs for front-end consumption and other services ● Containerization of services ● Collaborate with cross-functional teams to ensure the successful implementation of our blockchain solutions ● Write clean, efficient, and well-documented code ● Test and debug code to ensure the quality of our solutions ● Implement security measures to protect our blockchain solutions from potential threats ● Participate in code reviews and provide constructive feedback to other developers		

Skillset Requirements	● Bachelor's degree in computer programming, computer science, or a related field. ● Typescript (strongly preferred) or Javascript, experience in Solidity is a plus. ● Experience in Node.js and server frameworks such as Express.js. ● Experience with cloud deployments (ideally on GCP but AWS is okay) ● Some experience with Docker (and Kubernetes is a plus) ● Experience with MongoDB or other NoSQL databases ● Excellent project and time management skills. ● Strong problem-solving and verbal and written communication skills. ● Knowledge in front-end web development is a plus

Business Analyst Intern

Moon Lab Academy Limited

Reference No.	YSIP106

Job Responsibilities	- Conducting research and analysis to identify business needs, market trends, and competitive landscapes. - Collaborating with cross-functional teams to define project scopes, objectives, and deliverables. - Assisting in the development of project plans, timelines, and resource allocation. - Conducting data analysis and creating insightful reports and presentations for management. - Participating in user acceptance testing and quality assurance activities. - Assisting in the preparation of documentation, user manuals, and training materials. - Supporting the implementation and deployment of new systems and processes. - Actively staying up-to-date with emerging technologies and industry best practices. - Contributing innovative ideas and insights to improve business processes and operations.
Skillset Requirements	- Currently pursuing a Bachelor's or Master's degree in Business Administration, Computer Science, Information Systems, or a related field. - Strong analytical and problem-solving skills, with the ability to gather and interpret complex data. - Excellent communication skills, both written and verbal, with the ability to effectively collaborate with diverse teams and stakeholders. - Proficiency in conducting research, data analysis, and creating reports using tools such as Excel, PowerPoint, or data visualization software.

	- Familiarity with business analysis methodologies, tools, and techniques. - Knowledge of project management principles and practices is a plus. - Demonstrated passion for technology and business, with a desire to learn and contribute innovative ideas. - Strong attention to detail and commitment to delivering high-quality work. - Ability to adapt to a fast-paced and dynamic work environment.

Algorithm Engineer

Neuvix Intelligent Technology (Hong Kong) Co., Limited

Reference No.	YSIP111
Company Profile	Providing digital innovative solutions for the transportation industry。 The company has currently formed two major series of products, NEX-Core artificial intelligence and NEX-Meta digital twin。

Company Website	NULL	**Application & Enquiries**	liuli@neuvix.cn
Job Function	Technology	**Number of Vacancy**	2
Working Mode	Full-time Part-time	**Work Location**	Science Park

Job Responsibilities	1. Responsible for developing high-quality AI algorithms, including but not limited to target detection, behavior recognition, tracking, etc.; 2. Responsible for the implementation, training, on-line, maintenance and optimization of AI algorithms; 3. Responsible for performance optimization and compatibility optimization of the company's existing AI components; 4. Responsible for the compilation of algorithm analysis, research documents and optimization reports in the development process; 5. Participated in the project demand analysis and technical scheme research. 6.Work on-site. Working hours: Monday to Friday 9 a.m. to 6 p.m. There is an hour lunch break.
Skillset Requirements	1. At least 2 years of working experience in AI development related positions with bachelor's degree (master's degree and doctor's degree can be appropriately relaxed); 2, proficient in C++, Python and other programming languages, proficient in OpenCV computer vision library; 3, familiar with the basic methods of machine learning (dimensionality reduction, classification, regression, etc.), familiar with the basic principles and basic models of deep learning, skilled use of at least one deep learning tool (such as Pytorch,TensorFlow, etc.); 4, familiar with computer vision algorithms (such as object detection, segmentation, classification, tracking, etc.), understand the principle and implementation of classical algorithms in the field; 5, have Linux development experience, have video platform development experience, have actual visual perception algorithm products and landing experience;

| | 6. Responsible for work, interested in new technology, strong learning ability and clear thinking;
7. Good communication skills and team spirit. |

Pre-sales Project Manager

Neuvix Intelligent Technology (Hong Kong) Co., Limited

Reference No.	YSIP112
Company Profile	Providing digital innovative solutions for the transportation industry。 The company has currently formed two major series of products, NEX-Core artificial intelligence and NEX-Meta digital twin。

Company Website	NULL	**Application & Enquiries**	liuli@neuvix.cn
Job Function	Science	**Number of Vacancy**	1
Working Mode	Full-time Part-time	**Work Location**	Science Park

Job Responsibilities	1. Fully leading the project implementation 2. Responsible for participating in the company's pre-sales projects and undertaking the work of pre-sales consultant。 3. Work in the office. Working hours: Monday to Friday 9 a.m. to 6 p.m. There is an hour lunch break.
Skillset Requirements	1. Bachelor degree or above in project management, engineering management, etc 2. Have PLM project service experience in different industries, especially in the software product industry, and have independent PLM system requirement analysis and program design capabilities 3. With electronic or mechanical design or other manufacturing related professional background, familiar with the whole process of product design business 4. Master the business background knowledge of various management modules of PLM, and be able to communicate with business related personnel independently and give high-quality suggestions 5. Like to study IT technology, and have the ability to optimize business processes with tools 6. Good at expression and communication, insight and patience, can listen to customer demand statements, not anxious, not impatient, control the pace 7. Programmer

Fundtech (HK) Limited

Reference No.	YSIP120
Company Profile	Fundtech (HK) Limited is an incubatee company in Science Park. We are formed by a group of former and current financial sector and regulatory sector professionals. We aim to be a one-stop solution provider to mitigate Anti-Money Laundering (AML) risks through digital transformation in the financial sector. Our flagship solution "FACE" is a one-stop platform to support fund managers' and fund administrators' key operational functions to control costs and manage their internal resources effectively. Subsequently, fund managers can focus on their core activities of investing and investor relations. Core functions for "FACE" include investor KYC, AML check, investor fund in and out monitoring, fund accounting, transfer agency, regulatory compliance, legal support, and middle office operational tasks. Target clients are fund managers and fund administrators, initially located in Hong Kong and the Greater Bay Area, and target to expand into South East Asia at a later stage.

Company Website	https://fund-tech.hk/	Application & Enquiries	cs@fund-tech.hk
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	Job Description - Work with a team of Web/App/System developers to develop and implement - Run extensive tests to confirm proper functionality and desired results - Troubleshoot errors effectively and efficiently - Create, manage, and maintain coding databases - Energetic, pro-active and hardworking - 5-day work week - Good company culture, and work life balance		

Skillset Requirements	Requirement: -Full-time student from a local post-secondary or tertiary institution (including students of sub-degree, undergraduate and postgraduate programmes); - Preferred majoring in computer science, computer engineering, information technology, mathematics, statistics, data science, business and data analytics related. - Knowledge in some programming languages (JavaScript, Python, C#, Swift, Java, SQL etc.) - Professional manner and accountable for work performed - Strong analytical and problem-solving skills - Proficiency in Cantonese, English and Mandarin preferred

Software Engineer

Accessible Vision

Reference No.	YSIP121
Company Profile	Accessible Vision is an innovative startup dedicated to revolutionizing the lives of visually impaired individuals through cutting-edge assistive technology. Our core offering is an innovative assistive wearable device kit meticulously designed to empower the visually impaired, enabling them to explore and navigate unfamiliar environments with confidence, independence, and privacy. We recognize the transformative potential of our assistive device within these settings, enabling facility owners to not only provide an enhanced and inclusive experience to visually impaired visitors but also leave a lasting positive impression in the realm of Environmental, Social, and Governance (ESG) initiatives. Our commitment to excellence extends to our B2B partners, encompassing the provision of comprehensive technical support. We ensure the seamless integration and operation of our device within their facilities.

Job Function	Technology	Number of Vacancy	1
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	Science Park

Job Responsibilities	Embark on a transformative internship with Accessible Vision as an Embedded System Engineer Intern. Contribute to the development of cutting-edge assistive technology that empowers visually impaired individuals to explore and navigate with confidence. As an Embedded System Engineer Intern, you will work on the hardware and firmware of our wearable device kit, ensuring seamless integration and optimal performance. This role involves the hands-on deployment of embedded systems and hardware in Nvidia Jetson Systems and ESP32.
Skillset Requirements	- Knowledge of embedded systems and microcontroller programming - Proficiency in C/C++ and Linux for embedded systems - Strong problem-solving and analytical skills - Ability to work collaboratively in a team environment - Eagerness to learn and adapt to new technologies

Project Coordinator

Velenova Limited

Reference No.	YSIP123		
Company Profile	Velenova is a company deeply embedded in developing RF and Microwave Measurement Solutions by delivering systems and products to customers operating in the areas of 5G/6G communication, Satellites, Automotive and Vehicle, Wireless and EMC. Our well-known experts are dedicated to delivering superior engineering solutions for applications such as production line or general automated component testing.		
Company Website	www.velenova.com.hk	Application & Enquiries	info@velenova.com.hk
Job Function	Business	Number of Vacancy	1
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	Monitoring the daily progress of projects; Providing detailed updates to project managers or other stakeholders; Ensuring team members or collaborative parties have the supplies and resources they need to complete their assigned tasks on time and within their budget limits; Planning meetings and organizing project logistics; Ordering necessary office supplies.		
Skillset Requirements	Major: Studying in management or language-related discipline Communication: Excellent verbal and written communication skills are essential to work closely with team members and managers, and effectively manage problems as they occur. Leadership: As the primary point of contact for team members, you must be able to provide guidance, feedback, and encouragement for achieving goals. Organization and time management: Managing the daily activities and needs of an entire team requires an excellent ability to multitask and effectively manage your time. Computers and data entry: Budgets and other important documents for companies are usually created on computers and sometimes maintained in databases. Problem-solving: Although project managers may step in to handle significant problems, you should be prepared to work through and resolve minor issues without assistance. Positive attitude: Generally, a positive outlook makes it easier to handle the stress of unexpected challenges and also helps the entire team stay positive and motivated.		

Assistant Engineer

Velenova Limited

Reference No.	YSIP124		
Company Profile	Velenova is a company deeply embedded in developing RF and Microwave Measurement Solutions by delivering systems and products to customers operating in the areas of 5G/6G communication, Satellites, Automotive and Vehicle, Wireless and EMC. Our well-known experts are dedicated to delivering superior engineering solutions for applications such as production line or general automated component testing.		
Company Website	www.velenova.com.hk	Application & Enquiries	info@velenova.com.hk
Job Function	Technology	Number of Vacancy	1
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	Research and Evaluate State-of-the-Art Robotic Systems Develop antenna measurement Systems for Applications in Robotics and Automation		
Skillset Requirements	Graduate in STEM-related discipline such as Mechanical Engineering, Computer Engineering or relevant disciplines For bachelor's degree holder, they will be considered for the position of Assistant Engineer Experience in using AutoCAD, Solidworks, Matlab and Labview. Experience in programming using Java, C/C++ and Python. Experience in Arduino development and 3D Printing Experience in Systems Development Life Cycle is a plus.		

Project Assistant (R&D)

ISOFOODTRACE LIMITED

Reference No.	YSIP125		
Company Profile	IsoFoodtrace authenticates food origin and production practices using a biochemical fingerprinting technique powered by stable isotope technology, offering time- and cost-efficient third-party testing that assures customers of the identity of the products they buy. Stable isotope analysis measures the natural weight variations in atoms of biological materials, and acts as a naturally occuring biochemical fingerprint. The technology eliminates the need for supply chain auditing by directly testing only a few gram physical samples of the end product itself. Through machine learning analysis, these fingerprints can be harnessed to identify and confirm different attributes of food, including origin, wild-caught, organic, grass-fed and free-range.		
Company Website	https://www.isofoodtrace.com	Application & Enquiries	cluk@isofoodtrace.com
Job Function	Science	Number of Vacancy	2
Working Mode	Part-time	Work Location	Science Park
Job Responsibilities	soFoodtrace is a food testing company that uses stable isotope analysis to verify food labels and track food origin. We aim to build a food product isotope database, against which the fingerprints of certification candidates can be compared to verify label claims for Asian food market. We are seeking interns with science background whom are interested in project managment, and research & development (R&D) Responsibilities: - develop marketing materials and related actions - develop food origin stable isotope referencing database - support for the business R&D work of the food stable isotope technology - Assist in daily operation		

Skillset Requirements	Requirement
	- must be STEM (Science, technology, engineering, and mathematics related full time undergraduate students
	- interested in science and project management work
	- passionate, independent & willing to take challenge
	- self-motivated and has a strong sense of responsibility
	- relevant laboratory/R&D experience is preferred

A.I. Research Assistant

ATech Solution Limited

Reference No.	YSIP126
Company Profile	ATech Solution Limited specializes in providing excellent software development and web application development. We work with companies all over the world, from small single-person businesses to large corporations. Since the emergence of the pandemic in 2019, companies across various industries have embraced remote work and flexible hours as a new norm. However, a significant challenge arises in maintaining effective collaboration and fostering in-person connections. ATech has faced similar challenges since establishing their development center in Indonesia. They encountered issues such as decreased productivity, a lack of camaraderie among colleagues, difficulties in management control, and feelings of physical and psychological isolation. Recognizing the opportunity, ATech's co-founders created Capacitor, a Remote Work System Software as a Service (RWS SaaS) platform powered by artificial intelligence (AI). Capacitor aims to enhance productivity and improve the well-being of staff members operating in this new work paradigm.

Company Website	https://atech.software	**Application & Enquiries**	felix@atech.software
Job Function	Business	**Number of Vacancy**	2
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	-Responsible for coordinating and executing projects across various departments. -Contribute to product development efforts by conducting market research and analyzing customer needs. -Assist in marketing initiatives, including content creation, campaign management, and market analysis. -Support research and development activities, staying updated on industry trends. -Strong organizational and communication skills required. -Thrive in a fast-paced, collaborative environment. -Opportunity to gain hands-on experience across multiple disciplines and contribute to organizational growth.

Skillset Requirements	-Strong project management skills, including organization, prioritization, and the ability to meet deadlines. -Knowledge of product development methodologies and the ability to conduct market research and analyze customer needs. -Proficiency in marketing principles, including content creation, campaign management, and market analysis. -Research skills, including the ability to stay updated on industry trends, conduct literature reviews, and contribute to experimental design. -Data analysis and interpretation skills to support evidence-based decision-making. -Excellent communication and collaboration skills to work effectively with cross-functional teams and stakeholders. -Adaptability and flexibility to thrive in a fast-paced, dynamic environment with changing project priorities. -Attention to detail and accuracy in project execution and deliverables. -Problem-solving and critical thinking abilities to identify challenges and propose innovative solutions. -Strong organizational and time management skills to handle multiple tasks and projects simultaneously.

Internship on Frontend Development

TadReamk Limited

Reference No.	YSIP127
Company Profile	Tadreamk Limited was established in February 2023 to develop state-of-the-art artificial intelligence technology for trademark applications. The company received its initial funding through the Technology Start-up Support Scheme for Universities (TSSSU) Program. Additionally, on July 25th, 2023, the company became a member of the Incubation Programme at the Hong Kong Science and Technology Park (HKSTP). TadReamk boasts a team of world-renowned scientists, AI experts, including professor, PhD students, research engineers, full stack developers, and business professionals. Each member of TadReamk shares a common passion for AI and entrepreneurship.

STEM Intern - Research and Development

Smart Sensing Limited

Reference No.	YSIP132		
Company Profile	At Smart Sensing Ltd., we're committed to revolutionizing the way cities and businesses gather and analyze data. Our proprietary AIoT architecture provides cutting-edge smart city and business intelligence solutions that are helping to transform the way people live and work. Our core technology, built from years of research on IoT sensing with smart cameras and RF devices, has been recognized with multiple awards for its outstanding impact on the industry. Our focus is on improving operational efficiency and enhancing the customer experience in the cities we serve. Our goal is to help transform Hong Kong into a world-class smart city, starting with our recent target market in smart property management across various sectors such as shopping malls, exhibition halls, hotels, museums, and hospitals.		
Company Website	www.smartsensing.biz	Application & Enquiries	dick.tang@smartsensing.biz
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	- Support the research and development team in conducting experiments, data collection, and analysis. - Assist in designing and implementing research methodologies and protocols. - Contribute to literature reviews and research documentation. - Collaborate with team members to perform R&D		
Skillset Requirements	- Studying Bachelor's degree in Computer Engineering, Electrical Engineering, or other related majors. - Experience with C/C++, Java or some scripting languages (Python/Bash/etc.). - Willingness to learn new technologies		

Mechanical Engineer

GymNation

Reference No.	YSIP133		
Company Profile	GymNation is a cutting-edge fitness technology company committed to reshaping the way people engage with home workouts. Our flagship product, an AI-powered cable machine, offers over 100 versatile exercises in a compact design, bringing the gym experience to your home. Founded on the belief that fitness should be accessible to everyone, GymNation combines innovative hardware with an adaptive app, functioning as a personalized fitness companion. With a commitment to user-centric design and continuous improvement, GymNation is positioned at the forefront of the burgeoning home fitness market. Our mission is to empower individuals of all fitness levels to achieve their health goals conveniently and effectively, ushering in a new era of accessible and intelligent fitness solutions.		
Company Website	NA	Application & Enquiries	donaldwongsuisang@gmail.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Part-time	Work Location	home office
Job Responsibilities	The Mechanical Engineer is a linchpin in the design and development of our cutting-edge fitness equipment. Their pivotal role encompasses conceptualizing and executing intricate mechanical designs, conducting comprehensive structural analyses, and collaborating seamlessly with cross-functional teams to bring avant-garde products to market. From the inception of prototypes to the fine-tuning of end products, they wield influence across the entire product development lifecycle. Leveraging expertise in materials, proficiency in manufacturing processes, and mastery of CAD tools, the Mechanical Engineer plays a crucial part in crafting resilient and efficient mechanical solutions. This role is integral to our commitment to revolutionize the fitness industry, ensuring each product attains the highest standards of innovation and quality, setting a new benchmark for excellence.		
Skillset Requirements	Our ideal candidate possesses a robust skillset essential for excelling in the role of a Mechanical Engineer. Proficiency in CAD tools, including SolidWorks and AutoCAD, is a fundamental requirement, coupled with a deep understanding of materials and manufacturing processes. Strong analytical skills for conducting thorough structural analyses and the ability to translate conceptual designs into tangible, efficient solutions are key. Adeptness in collaborating across cross-functional teams and a keen eye for detail in every phase of the product development lifecycle are crucial.		

	Demonstrated problem-solving abilities, effective communication skills, and a passion for staying abreast of industry trends are additional assets we seek. The successful candidate will bring not only technical expertise but also a creative mindset to contribute innovatively to our goal of redefining fitness equipment design and development.

Business Analytics Intern

Manifold Tech Limited

Reference No.	YSIP134
Company Profile	Manifold Tech is a high-tech company specializing in real-time 3D mapping algorithms, advanced robotics, and laser scanning technology. Our expertise lies in precise real-time full-colour digital modeling. Our world-leading LiDAR technology allows us to scan "real-wold infrastructure" directly into computers with high accuracy and low cost, making it an ideal choice for industries that require a large amount of 3D data.

Company Website	manifoldtech.cn	Application & Enquiries	kevinlee@manifoldtech.cn
Job Function	Business	Number of Vacancy	2
Working Mode	Full-time	Work Location	Science Park

Job Responsibilities	1. Scan the global 3D reconstruction market with the company members and work closely with R&D, operation team 2. Grasp the dynamics of competitors and important manufacturers, pay attention to the cutting-edge trends of the industry 3. Explore the emerging business of 3D reconstruction technology in the fields of architecture, construction, and stomatology models and opportunities 4. mine andevaluating potential partners, and providing decision support and managementsupport for management
Skillset Requirements	1. Understand the industry and have their own views on the 3D reconstructionmarket; 2. Excellent PPT writing ability, skilled use of Excel, efficient execution and output capabilities; 3. Good interpersonal skills and teamwork spirit; 4. Full of passion for work, strongability to withstand pressure, curious about the pan-entertainment industry, and willing to share Current students pursuing architecture, surveying or stomatology degree are preferred

Engineer Intern

Manifold Tech Limited

Reference No.	YSIP135

Job Responsibilities	The project builds a web app and a mobile app as a training, progress tracking and communication platform for the students with Special Educational Needs (SEN) and their families. Elements of OCR (optical character recognition), AR (augmented reality) and		
Skillset Requirements	The project may involve ANY (one or more than one) of the following skillsets in the operation aspect, - Legal issues/ Employment/ Contract/ Terms and conditions - User and market research - Video editing and media production - Social media and copy		

Business Development Intern

LiDARist Company Limited

Reference No.	YSIP140
Company Profile	LiDARist is a cutting-edge startup specializing in the application of deep learning technology to geospatial data, with a specific emphasis on point cloud semantic segmentation and analysis. Our mission is to revolutionize the way we understand and interact with the 3D world by harnessing the power of artificial intelligence and machine learning. Our core focus lies in leveraging deep learning algorithms and techniques to unlock the vast potential hidden within geospatial point cloud data. Point cloud data, captured through advanced remote sensing technologies such as LiDAR or photogrammetry, provides us with rich and accurate three-dimensional representations of our environment. By applying deep learning to this data, we can extract valuable insights, perform advanced analytics, and develop innovative solutions for a wide range of industries. Founded in 2020, we have been participated in several service contracts with various government departments and being the pioneer in point cloud post-processing in Hong Kong.

Company Website	www.lidarist.com	**Application & Enquiries**	lidarist@lidarist.com
Job Function	Business	**Number of Vacancy**	1
Working Mode	Full-time Part-time	**Work Location**	Science Park
Job Responsibilities	• Conduct market research and analysis to identify potential business opportunities and target markets. • Assist in developing and implementing business development strategies to drive growth and expand our customer base. • Collaborate with the management to identify and pursue new business leads. • Assist in preparing and delivering compelling presentations to clients and stakeholders. • Assist in managing and nurturing client relationships through effective communication and regular follow-ups. • Stay up-to-date with industry trends, market dynamics, and competitive		

	landscape to identify potential areas for business growth. • Provide administrative support as needed.
Skillset Requirements	• Currently pursuing a bachelor's or master's degree in business administration, marketing, or a related field. • Strong passion for business development and a desire to learn and grow in this field. • Excellent communication skills, both written and verbal, with the ability to articulate ideas effectively. • Strong analytical and research skills to gather and interpret data and market trends. • Proactive and self-motivated with the ability to work independently and as part of a team. • Proficiency in Microsoft Office Suite (Word, Excel, PowerPoint). • Attention to detail and accuracy in work, ensuring high-quality deliverables. • Adaptability and willingness to take on new challenges and responsibilities.

Data Scientist (Intern) - 2D Image Semantic Segmentation

LiDARist Company Limited

Reference No.	YSIP141
Company Profile	LiDARist is a cutting-edge startup specializing in the application of deep learning technology to geospatial data, with a specific emphasis on point cloud semantic segmentation and analysis. Our mission is to revolutionize the way we understand and interact with the 3D world by harnessing the power of artificial intelligence and machine learning. Our core focus lies in leveraging deep learning algorithms and techniques to unlock the vast potential hidden within geospatial point cloud data. Point cloud data, captured through advanced remote sensing technologies such as LiDAR or photogrammetry, provides us with rich and accurate three-dimensional representations of our environment. Company Website	www.lidarist.com	**Application & Enquiries**	lidarist@lidarist.com
Job Function	Technology	**Number of Vacancy**	2
Working Mode	Full-time Part-time	**Work Location**	Science Park
Job Responsibilities	• Collaborate with the research and development team to design and develop deep learning models and algorithms for 2D image semantic segmentation. • Implement and fine-tune state-of-the-art deep learning architectures such as SAM, Mask R-CNN or other models to achieve accurate and efficient segmentation results. • Preprocess and augment image datasets to improve model performance and generalization. • Train and validate deep learning models using large-scale annotated datasets and existing datasets from the company. • Evaluate and analyze model performance by using appropriate metrics and statistical techniques. • Stay up-to-date with the latest advancements in deep learning and		

	computer vision, and propose innovative ideas to improve our segmentation algorithms. • Collaborate with cross-functional teams, including data scientists, GIS analyst and programmer, to integrate the developed models into our software solutions.
Skillset Requirements	• Currently pursuing a bachelor's or master's degree in computer science or a related field with a focus on machine learning, computer vision, or deep learning. • Strong understanding of deep learning concepts, architectures, and frameworks such as TensorFlow, PyTorch, or Keras. • Familiarity with image processing and computer vision algorithms. • Proficiency in programming languages such as Python and C++. • Knowledge of semantic segmentation techniques and experience with related frameworks like Mask R-CNN, SAM, or DeepLab V3+ is a plus. • Solid understanding of machine learning fundamentals, including data preprocessing, model training, and evaluation. • Experience with deep learning model deployment and optimization techniques is desirable. • Strong problem-solving skills and the ability to think critically and creatively. • Excellent communication and teamwork skills to collaborate effectively with cross-functional teams. • Attention to detail and a commitment to producing high-quality results.

UI/UX Designer

PanopticAI Limited

Reference No.	YSIP142		
Company Profile	Vitals, powered by PanopticAI, is an award-winning camera-based health and wellness monitoring solution that makes measuring, interpreting and managing personal health contactless, affordable and as easy as smiling at a camera. Built on state-of-the-art artificial intelligence and signal processing, Vitals delivers comprehensive digital biomarkers with medical-grade accuracy in under 30 seconds. It can be installed on common consumer devices and used remotely or in person, revolutionising remote healthcare, personal wellness and much more.		
Company Website	www.panoptic.ai	Application & Enquiries	kylewong@panoptic.ai
Job Function	Others (e.g Design, Finance, etc.)	Number of Vacancy	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	Research, conceptualize and develop a comprehensive UI/UX design strategy and solutions for the brand. Create original graphic designs (e.g. images, sketches and tables) Illustrate design ideas using storyboards, process flows and sitemaps Design graphic user interface elements, like menus, tabs and widgets Qualifications		
Skillset Requirements	Knowledge of design tools such as Figma, PhotoShop, Illustrator, XD, or other tools for creating low / high-fidelity prototype A good team player, independent, self-disciplined, responsible Good command of English, Cantonese is optional		

Digital Strategy Analyst

PanopticAI Limited

Reference No.	YSIP143
Company Profile	Vitals, powered by PanopticAI, is an award-winning camera-based health and wellness monitoring solution that makes measuring, interpreting and managing personal health contactless, affordable and as easy as smiling at a camera. Built on state-of-the-art artificial intelligence and signal processing, Vitals delivers comprehensive digital biomarkers with medical-grade accuracy in under 30 seconds. Job Function	Others (e.g Design, Finance, etc.)	**Number of Vacancy**	1
Working Mode	Full-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	Gather and analyze technology business information to help the team better understand business opportunities, competition, pricing, research capabilities, etc. Develop, design and execute a digital marketing strategy; Work with project team to collect client's feedback and brainstorm ideas for new areas of innovation Participate in project meetings and contribute in project planning and execution.
Skillset Requirements	Experience in design tools like Photoshop and Canva is a plus A good team player, independent, self-disciplined, responsible Good command of English, Cantonese is optional

Product Development Specialist

Blue Pin (HK) Limited

Reference No.	YSIP144
Company Profile	Blue Pin is a Hong Kong based software company that specializes in hotel automation solutions. Our mission is to revolutionize the hospitality industry by integrating technology to enhance operational efficiency, improve customer satisfaction, and increase revenue for hotels. We provide comprehensive self-check-in solutions that streamline the check-in/out process, reduce staff workload, and offer a personalized and seamless experience for guests. As automation is urgently needed in the industry, and that is the reason why GSR (Guest Services Robot) is here. GSR is an all-in-one PMS (Property Management System) optimizer empowered by automated technology. With the PMS integration platform provided by GSR, hotel guests could now expect an automated omnichannel experience. Hotels can use GSR to communicate with hotel guests using different kinds of instant messaging apps, to guide hotel guests to do mobile check-in, and to distribute digital coupons (e-shop vouchers or discount coupons) to perform upsell activities.

Company Website	www.bluepin.hk	**Application & Enquiries**	sylvia.leung@bluepin.hk
Job Function	Technology	**Number of Vacancy**	2
Working Mode	Part-time Mixed Mode (Full time & Part-time)	**Work Location**	Science Park

Job Responsibilities	We are seeking a talented and innovative Product Development Specialist to join our team and contribute to the development of cutting-edge travel-tech system for our Guest Services Robot. The successful candidate will be responsible for designing, testing, and implementing new features and functionality for our systems. The role requires technical background, excellent problem-solving skills, and a passion for innovation. Responsibilities: - Assist in gathering requirements and designing new software features and functionality - Collaborate with cross-functional teams to develop, test, and implement software code - Contribute to the troubleshooting and debugging of software issues - Learn and apply software development methodologies and tools, such as Python,

	Node JS and MongoDB - Participate in team meetings and presentations to share progress and ideas - Complete projects and present findings to the team and company stakeholders
Skillset Requirements	- Currently pursuing a bachelor's or master's degree in computer science or related field - Strong academic record and passion for technology and innovation - Proficiency in at least one programming language, such as Python, Java, or Node JS - Strong problem-solving and analytical skills - Excellent communication and collaboration skills - Ability to learn quickly and take on new challenges - Interest in the hospitality industry and hotel operations is a plus

NLP Engineer

Blissmi Limited

Reference No.	YSIP146		
Company Profile	Blissmi is a maternal health and wellness platform that uses AI to predict and personalize the best journey for every woman at every stage of her motherhood journey. Our aim is to create universal access to maternal healthcare for all women and ensure maternal health equity globally. We connect women going through fertility, pregnancy, postpartum, parenting and menopause with our global network of vetted service partners all in one place.		
Company Website	https://myblissmi.com	Application & Enquiries	natasha@myblissmi.com
Job Function	Technology	Number of Vacancy	1
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	NLP Model Development: Develop, implement, fine-tune NLP models to solve specific business problems. Develop and experiment with state-of-the-art NLP algorithms and architectures. Incorporate techniques such as deep learning, transfer learning, and unsupervised learning into model development. Data Preprocessing and Feature Engineering: Clean, preprocess, and prepare large-scale datasets for effective NLP modeling. Engineer features that enhance model performance and interpretability. Model Evaluation and Optimization: Conduct thorough evaluation of NLP models, employing metrics like accuracy, precision, recall, F1-score, etc. Implement techniques to address issues such as overfitting, bias, and variance. Optimize models for deployment in resource-constrained environments. Integration and Deployment: Integrate NLP models into existing or new applications. Ensure models are deployable and scalable in production environments. Continuous Research and Innovation: Proactively identify opportunities to apply new techniques or technologies to improve NLP capabilities.		

Skillset Requirements	Graduated from a Bachelor's or higher degree in Computer Science, Engineering, or a related field. Experience in NLP model development and implementation. Proficiency in programming languages like Python and experience with NLP libraries (e.g., NLTK, spaCy, TensorFlow, PyTorch). Strong understanding of machine learning principles and experience with relevant libraries (e.g., scikit-learn, Keras). Familiarity with data preprocessing techniques and tools. Experience with deploying NLP models in production environments (e.g., Docker, Kubernetes). Excellent problem-solving and analytical skills. Effective communication and teamwork abilities. Bonus Skills: Experience with cloud platforms (e.g., AWS, GCP, Azure). Knowledge of distributed computing and big data processing frameworks (e.g., Apache Spark). Understanding of domain-specific NLP applications (e.g., sentiment analysis, named entity recognition, chatbots).

Machine learning engineer

Blissmi Limited

Reference No.	YSIP147		
Company Profile	Blissmi is a maternal health and wellness platform that uses AI to predict and personalize the best journey for every woman at every stage of her motherhood journey. Our aim is to create universal access to maternal healthcare for all women and ensure maternal health equity globally. We connect women going through fertility, pregnancy, postpartum, parenting and menopause with our global network of vetted service partners all in one place.		
Company Website	https://myblissmi.com	**Application & Enquiries**	natasha@myblissmi.com
Job Function	Technology	**Number of Vacancy**	1
Working Mode	Full-time Part-time Mixed Mode (Full time & Part-time)	**Work Location**	InnoCentre
Job Responsibilities	Problem Definition: Collaborate with cross-functional teams to understand business objectives and define machine learning problems that can address those objectives. Data Collection and Preprocessing: Acquire, clean, and preprocess data from various sources to prepare it for machine learning algorithms. Collaborate with data engineers to ensure a consistent flow of high-quality data. Feature Engineering: Identify relevant features and engineer new ones to improve model performance. Model Development: Design and implement machine learning models that are scalable, efficient, and suitable for the given problem. Experiment with different algorithms and approaches to find the best-performing models. Model Training and Evaluation: Train models using appropriate datasets and fine-tune hyperparameters for optimal		

	performance. Evaluate model performance using relevant metrics and adjust models accordingly. Deployment: Deploy machine learning models to production environments. Monitor and maintain deployed models, ensuring they continue to perform effectively. Integration: Integrate machine learning solutions into existing systems and applications.
Skillset Requirements	Bachelor's or higher degree in Computer Science, Machine Learning, Statistics, or a related field. Solid understanding of machine learning algorithms, data structures, and computer science fundamentals. Proficiency in programming languages such as Python, R, or Julia. Experience with machine learning libraries/frameworks like TensorFlow, PyTorch, or scikit-learn. Knowledge of data visualization tools and techniques. Strong problem-solving skills and attention to detail. Experience with version control systems (e.g., Git) and collaborative development. Excellent communication skills and the ability to explain complex concepts to non-technical stakeholders.

Engineering Intern

MicroMag Healthcare Limited

Reference No.	YSIP148		
Company Profile	MicroMag Healthcare is dedicated to weaving engineering research and medical applications together and preventing outbreaks of infectious diseases by providing a rapid, accurate, fully automated diagnosis with our novel microrobotic technology, such that timely treatment is possible by prompt screening.		
Company Website	www.micromaghealthcare.com	Application & Enquiries	info@micromaghealthare.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	• Conducting experiments and collecting numerical data for analysis; • Developing new features (Mechanical/Electronic) for the prototype while working with the clinical team; • Modifying the current prototype for production needs; • Modifying the current prototype for regulatory compliance; • Communication with external parties like regulatory consultants and manufacturers; • Undertaking other ad-hoc tasks as assigned by the research team		
Skillset Requirements	1. Studying in Mechanical Engineering, Electronic Engineering or related disciplines or other disciplines with a strong technical background 2. Mechanical CAD (in SolidWorks) and prototyping experience (3D printing, laser cutting, CNC machining, etc.) with strong hands-on skills; 3. Digital & analog circuit design, PCB drawing (in Altium) and prototyping; 4. Knowledge of magnetics, optics (Microscopy related), industrial design, QMS, and GMP will be advantageous; 5. Programming experience in MATLAB and LabView is a plus but not required; 6. Rendering experience in Blender or SOLIDWORKS Visualize is a plus but not required;		

	7. Ability to work in a fast-paced environment;
	8. Willingness to learn and expand skill set to fill multiple Engineering roles
	9. Ability to communicate well with co-workers and external parties;
	10. Ability to work independently without micromanagement

Healthcare Business Research Analyst Intern

MicroMag Healthcare Limited

Reference No.	YSIP149		
Company Profile	MicroMag Healthcare is dedicated to weaving engineering research and medical applications together and preventing outbreaks of infectious diseases by providing a rapid, accurate, fully automated diagnosis with our novel microrobotic technology, such that timely treatment is possible by prompt screening.		
Company Website	www.micromaghealthcare.com	Application & Enquiries	info@micromaghealthare.com
Job Function	Business	Number of Vacancy	2
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	• Gathering data from various platforms; • Conducting market research and trends analysis in medical robotics-related technology to generate business insight and make recommendations; • Preparing business proposals, presentations, and reports; • Assisting the implementation of business development and commercialization plans; • Undertaking other ad-hoc tasks as assigned by supervisors		
Skillset Requirements	1. Studying in IT, Business Administration, Engineering, or related disciplines; 2. Knowledge of mathematics and statistics; Proficiency in Excel, RStudio and other data visualisation tools like Tableau, Sisense, etc; 3. Experience/knowledge in the medical industry will be advantageous; 4. Experience in pitch deck preparation is a plus but not required; 5. Efficient and independent working ability; 6. Good interpersonal, writing and presentation skills in English and Chinese.		

R&D Internship

Zoo Gears Limited

Reference No.	YSIP150
Company Profile	Introduction: Zoo Gears Limited, an innovative force in the pet technology industry, is dedicated to enhancing the lives of pets and their owners through cutting-edge products. Established with a passion for merging technology with pet care, Zoo Gears pioneers the development of smart pet gadgets and IoT solutions. Vision: Our vision is to create a harmonious bond between pets and their owners by introducing intelligent and interactive pet products. We aim to be the forefront of the pet tech revolution, redefining how we understand, care for, and connect with our animal companions.

Company Website	www.zoogears.com	**Application & Enquiries**	dean@zoogears.com
Job Function	Technology	**Number of Vacancy**	2
Working Mode	Full-time	**Work Location**	Science Park

Job Responsibilities	Who we are looking for: • Either a dog lover, a music lover or a technologist enthusiast; • Creativity in new ideas and future focus vision; • Collaboration with colleagues and the community at large; • Work Smart, Play Smart!
Skillset Requirements	You'll be a good fit if you are: • Year 1 or above full time undergraduate students from relevant discipline: Science / Engineering / Computer science • Both local and overseas students with HK residence • Energetic, enthusiastic, passionate and willing to take challenges • Excellent communications and interpersonal skills

Technical Project Administrator

Apicem Technology Services Company Limited

Reference No.	YSIP151		
Company Profile	Apicem Technology Services Company Limited is a premium provider of advanced air technology products as well as latest, most efficient and best price performance air technology solutions. Our core disruptive technologies include patented safe and green Baal Decontamination Technology empowered by 20kV HVEF; dedicated Metal Material Module technology with 90%+ airflow efficiency; own designed cloud-based IAQ Monitoring; integration of existing central and distributed air conditioning technologies to suit different scenarios. Purifying Effectiveness includes effective carbon reduction, superior antimicrobial activity, outstanding odors improvement and prevent cross-area contamination. Please contact info@hkapicem.com or visit www.hkapicem.com for more details.		
Company Website	www.hkapicem.com	Application & Enquiries	ahim.kho@hkapicem.com
Job Function	Technology	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park
Job Responsibilities	Support project coordination with supplier. Support coordination with customers on-site. Update and check webpage design and web site administration. Creating and updating project progress and performance.		
Skillset Requirements	Effective communication skill in cantonese, mandarin, and English. Pleasure polite and good communication skills. Self motivation and details oriented and able to work under pressure. Equiped with IT skill /kwonledge will be definitely an advantages. Proficient in MS Word, Excel and Powerpoint etc.		

Engineering Internship

Team Orz Limited

Reference No.	YSIP152
Company Profile	Team Orz Limited is a pioneering force in sustainable marine ecosystem restoration, committed to innovative solutions addressing environmental challenges. Our core focus lies in leveraging advanced manufacturing, specifically additive manufacturing with a topological approach, for oyster reef restoration. With a profound commitment to ecological conservation, our technology aims to revitalize coastal ecosystems and promote marine biodiversity. Vision: At Team Orz, we envision a world where cutting-edge technology harmonizes with nature. Our vision is to be a global leader in marine restoration, contributing significantly to the preservation of diverse aquatic ecosystems. Mission: Our mission is to revolutionize oyster reef restoration using additive manufacturing, maximizing the impact of marine conservation efforts. Through topological innovation, we strive to create sustainable solutions that not only restore but enhance the vitality of coastal environments.

Company Website	www.teamorz.com	Application & Enquiries	thomas@teamorz.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time	Work Location	KWAI CHUNG
Job Responsibilities	Responsibilities: 1. Develop electronic circuits and systems for environmental monitoring. 2. Integrate sensors and data acquisition modules into monitoring devices. 3. Collaborate with cross-functional teams to enhance monitoring system capabilities. 4. Conduct hands-on prototyping and testing of electronic components. 5. Participate in the design and implementation of innovative environmental technologies. 6. Analyze and interpret data from monitoring systems. 7. Contribute to documentation and reports on electronic engineering aspects. 8. Engage in problem-solving sessions and offer creative solutions. 9. Communicate effectively within a dynamic team environment.		

Skillset Requirements	Requirements: 1. Strong foundation in electronic engineering. 2. Proficient in circuit design and prototyping. 3. Hands-on experience with sensor integration. 4. Knowledge of data analysis techniques. 5. Innovative mindset and problem-solving skills. 6. Effective communication and collaboration skills. 7. Passion for environmental technology.

Software Engineering Intern - Government Contracts and Security

Fill Easy Limited

Reference No.	YSIP153		
Company Profile	At Fill Easy, we are passionate about making it easier for organizations to access government data. We understand the immense value that government data holds in driving decision-making, innovation, and societal progress. However, we also recognize the challenges that organizations often face when trying to navigate complex government systems and access the data they need. We bridge this gap and empower organizations by providing a streamlined and efficient solution for accessing government data - enabling organizations to focus on what they're best at.		
Company Website	https://fill-easy.com/	Application & Enquiries	rachellau@fill-easy.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Full-time	Work Location	Science Park
Job Responsibilities	Project areas: Government Contracts and Security Key Responsibilities Code Analysis and Testing: Develop a keen eye for detail by reading and understanding complex codebases. You'll be responsible for writing robust unit tests, ensuring the software we deliver is reliable and meets strict security standards. Manual Testing and Quality Assurance: Go beyond the code by manually testing software based on specific requirements. Your insights will be vital in identifying potential issues and improving the overall quality of our products. Team Collaboration: Work closely with experienced engineers and project managers. This is a chance to experience firsthand the collaborative efforts that go into successful government and MNC projects. Learning and Growth: Engage in continuous learning about new technologies, software development best practices, and the unique challenges of government-related projects. This internship is a gateway to understanding the complexities and rewards of working in a high-stakes environment.		

Skillset Requirements	Educational Background: Currently pursuing or recently completed a degree in Computer Science or a related field.
	Technical Skills: Basic understanding of coding and software development principles. Familiarity with unit testing is a plus.
	Keen Learner: Eagerness to delve into complex projects, with a willingness to tackle both coding and non-coding tasks.
	Security Minded: Interest in the aspects of software security, understanding its importance in government and MNC contexts.
	Team Player: Strong communication skills and the ability to work effectively in a team.

IoT Specialist Intern

Blendify

Reference No.	YSIP154		
Company Profile	Experience the future of healthy eating with our all-in-one smoothie vending machine. Our innovative solution offers fresh and customized smoothies, making wellness accessible to all. With a wide range of ingredients and flavors, users can create their own personalized blends. Our goal is to promote a healthy diet in an affordable and convenient manner, ensuring that everyone can enjoy nutritious and delicious smoothies on the go.		
Company Website	www.blendify.com	Application & Enquiries	info@blendandgohk.com
Job Function	Technology	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Assist in the development and implementation of IoT systems for smoothie vending machines. Support the integration of sensors and actuators for real-time monitoring of inventory and machine performance. Assist in managing data collection, storage, and analysis processes to gain insights on machine usage and customer preferences. Learn and contribute to the implementation of remote monitoring and control features for proactive maintenance and software updates. Collaborate with the team in testing and troubleshooting IoT systems to ensure functionality and reliability.		
Skillset Requirements	Basic understanding of Internet of Things (IoT) concepts and technologies. Knowledge of programming languages such as Python, Java, or C++. Familiarity with hardware components and sensors commonly used in IoT systems. Ability to work with connectivity protocols such as MQTT, HTTP, or CoAP. Proficiency in data management and analysis, including databases and data visualization tools. Strong problem-solving skills with the ability to troubleshoot technical issues. Good communication and teamwork skills to collaborate effectively with cross-functional teams.		

Operation Specialist Intern

Blendify

Reference No.	YSIP155		
Company Profile	Experience the future of healthy eating with our all-in-one smoothie vending machine. Our innovative solution offers fresh and customized smoothies, making wellness accessible to all. With a wide range of ingredients and flavors, users can create their own personalized blends. Our goal is to promote a healthy diet in an affordable and convenient manner, ensuring that everyone can enjoy nutritious and delicious smoothies on the go.		
Company Website	www.blendify.com	Application & Enquiries	info@blendandgohk.com
Job Function	Business	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Coordinate and schedule lab tests, ensuring smooth and efficient operations. Assist in managing partnerships with external vendors, suppliers, and stakeholders. Handle administrative tasks such as documentation, data entry, and organizing files. Support the operations team in coordinating logistics for equipment and materials. Assist in maintaining inventory and tracking stock levels for lab supplies. Collaborate with cross-functional teams to ensure timely and accurate execution of tasks.		
Skillset Requirements	Strong organizational and coordination skills to manage lab test schedules and partnerships effectively. Proficiency in administrative tasks, including documentation, data entry, and file organization. Excellent attention to detail to ensure accuracy in tasks and records. Good communication skills to collaborate with internal and external stakeholders. Ability to multitask and prioritize tasks in a fast-paced environment.		

Software Engineer Intern

Promptify Limited

Reference No.	YSIP156		
Company Profile	A marketplace for generative AI in the Asia market, specifically tailored to meet the content solution needs of users in the region. This marketplace will provide a platform for creators and consumers to access, share, and monetize generative AI content, fostering innovation and collaboration in the industry.		
Company Website	www.promptifyhk.co	Application & Enquiries	yslo@connect.ust.hk
Job Function	Technology	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Support marketplace platform development, including backend services, APIs, and UI. Collaborate on feature implementation and database optimization. Assist with integration of third-party services for enhanced functionality. Gather user feedback, participate in testing, and document development processes. Stay updated on marketplace development trends and emerging technologies.		
Skillset Requirements	API integration and working with third-party services Strong problem-solving and analytical skills Effective communication and collaboration abilities Attention to detail in writing clean, well-documented code Familiarity with testing methodologies and quality assurance		

Marketing Specialist

Promptify Limited

Reference No.	YSIP158		
Company Profile	A marketplace for generative AI in the Asia market, specifically tailored to meet the content solution needs of users in the region. This marketplace will provide a platform for creators and consumers to access, share, and monetize generative AI content, fostering innovation and collaboration in the industry.		
Company Website	www.promptifyhk.co	Application & Enquiries	yslo@connect.ust.hk
Job Function	Business	Number of Vacancy	2
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	InnoCentre
Job Responsibilities	Assist in developing and implementing marketing strategies. Conduct market research and competitor analysis. Create marketing content and manage social media accounts. Support planning and organizing marketing events. Monitor campaign performance and provide insights. Assist with SEO optimization and cross-functional collaboration. Track and manage marketing budgets.		
Skillset Requirements	Communication: Strong written and verbal communication skills. Market Research: Ability to gather and analyze data. Content Creation: Proficiency in creating engaging marketing content. Social Media Management: Familiarity with managing social media accounts. Event Planning: Basic knowledge of organizing marketing events. Analytics and Reporting: Ability to monitor and analyze campaign metrics.		

Digital Marketing Executive

T-REX TECHNOLOGY HK LIMITED

Reference No.	YSIP158		
Company Profile	Travel 3 is an innovative gamified experience application developed using Web3.0 technology. We provide exclusive benefits to users in a gamified format, such as discounts and membership perks, to enhance both local and international travel experiences. We offer comprehensive marketing solutions to businesses, helping them expand their audience and grow their business in collaboration with our platform.		
Company Website	https://travel3.app/	Application & Enquiries	info@travel3.app
Job Function	Business	Number of Vacancy	1
Working Mode	Mixed Mode (Full time & Part-time)	Work Location	Science Park and Work From Home
Job Responsibilities	Responsible for a variety of marketing tasks related to digital campaigns, and making sure the delivery is on schedule Copywriting of marketing materials for various social media channels and other relevant media formats Manage any ad hoc marketing duties as assigned by the management		
Skillset Requirements	Proficiency in creative writing in Chinese and English Hunger for learning about marketing in social media platforms such as Facebook, Instagram, etc Strong sense of responsibility, well organized with exceptional problem-solving skills with a can-do attitude Be a good team player with excellent interpersonal and communication skills		

AI / Data Science Research Assistant

T-REX TECHNOLOGY HK LIMITED

Reference No.	YSIP159

Marketing and Account manager

HappyJai Limited

Reference No.	YSIP163		
Company Profile	Introduction Influencer marketing is trending in digital marketing for a long period, many brands are shifting their marketing budget to KOL marketing. However, due to the information limitation of marketing agencies or KOL managers, brands usually can hardly find a perfect match KOL, among thousands of KOLs, for their campaigns. Look4kol unique algorithm allows brands to find the best match KOL for their marketing campaign, our database will analyze all the KOLs on marketing and compare the suitability towards the particular campaign. Look4kol database has more than 50millions data nodes on KOLs-fans interest segment that allows us to calculate the suitability of KOL's fans towards the campaign as well. 現時的網紅(KOL)行銷過於依賴經紀人或廣告中介本身對於市場上網紅(KOL)及相關資訊的了解，在配對 KOL 給商家時，廣告中介相當依賴他們的經驗及判決，而市面上有成千上萬的不同種類的 KOL，他們的粉絲群也各有不同，只依賴行內人自身經驗去配對廣告品牌與 KOL 未免過於落伍及欠準確，亦導致市面上絕多 KOL 行銷活動成效其實並未最佳化。 Look4kol 獨創大數據 KOL 分析，為廣告行銷活動從成千上萬個 KOL 中計算出最適合的 KOL，並透過多達 5000 萬數據的資料庫分析出 KOL 粉絲群和將要推廣商品的潛在興趣，讓廣告資金一擊即中！
