Project Manager (Clinical) Upwatch Technologies Limited

Reference No.	YSIP059		
Company Profile	<p>Population ageing has become one of the major issues in Hong Kong. It is not uncommon that a senior would need to wait weeks to schedule a body check in public hospitals, which can cause delays in the diagnosis of disease and treatments. The core business of our company is the development of AI-driven smartwatch-based mobile applications that monitor day-to-day movement patterns and measure aged-related disease risks, such as fall risk assessment, stroke prediction, dementia etc. The data collected from the smartwatch including walking patterns, running patterns, sleeping time, and other vital signs are analysed by our existing algorithm to predict the user's fall risk or stroke risk or other aged-related diseases. The benefit of this technology is to significantly lower the cost of disease screening and health monitoring and provide a thorough health assessment report for other health professionals to target the user's condition in order to provide treatment.</p>
