Technology Leaders of Tomorrow 2023 Programme (TLT2023)

Job Positions

Reference no.	Name of Company	Job Title
TLT001	Hong Kong Genome Institute	Senior Research Assistant / Research Assistant (Data Curation)
TLT002	Hong Kong Genome Institute	Project Coordinator
TLT003	Hong Kong Genome Institute	Bioinformatics Pipeline Engineer
TLT004	Huawei Hong Kong Research Center	Software Engineer
TLT005	Huawei Hong Kong Research Center	IC Engineer / Intern
TLT006	Huawei Hong Kong Research Center	Researcher / Research Intern
TLT007	Intact Financial	AI Developer
TLT008	Intact Financial	Data Scientist
TLT009	JSAB Technologies Limited	Senior Product Development Engineer / Product Development Engineer
TLT010	JSAB Technologies Limited	Senior Research and Development (R&D) / R&D Engineer
TLT011	Precision Robotics (Hong Kong) Limited	Assistant Mechanical Engineer
TLT012	Precision Robotics (Hong Kong) Limited	Assistant Electronics Engineer
TLT013	Precision Robotics (Hong Kong) Limited	Senior Software Engineer
TLT014	Precision Robotics (Hong Kong) Limited	Software Electronics Engineer / Electronic Engineer
TLT015	Precision Robotics (Hong Kong) Limited	Senior Robotics Engineer / Robotics Engineer
TLT016	Robocore Technology Limited	Software Engineer (Junior / Senior)
TLT017	SenseTime Group Limited	Researcher
TLT018	SenseTime Group Limited	Engineer
TLT019	Solos Technology Limited	Research and Development (R&D) Engineer (Algorithm)
TLT020	Take2 Health Limited	Associate Medical Technologist (AMT)
TLT021	TCL Corporate Research (HK) Co., Ltd	Computer Vision Engineer
TLT022	TCL Corporate Research (HK) Co., Ltd	Data Scientist / Machine Learning Engineer
TLT023	TCL Corporate Research (HK) Co., Ltd	Robot Engineer
TLT024	TCL Corporate Research (HK) Co., Ltd	Research Scientist / Engineer

Technology Leaders of Tomorrow Programme 2023

#TLT2023

Senior Research Assistant / Research Assistant (Data Curation) Hong Kong Genome Institute

Reference No.	TLT001
Company Website	https://hkgp.org/en/about-hkgi/hkgi/
Company Profile	<p>The Hong Kong Genome Institute (HKGI), establish and wholly owned by the Hong Kong SAR Government, commence full operations in 2021. With the vision “to avail genomic medicine to all for better health and well-being” and supported by the Health Bureau, HKGI works in close collaboration with the Department of Health, Hospital Authority, medical schools of local universities and other stakeholders to accelerate the development of genomic medicine in Hong Kong along four strategic foci: integrate genomics into medicine, advance research, nurture talents and enhance public genomic literacy.</p> <p>As the first step towards achieving its vision, HKGI launched the Hong Kong Genome Project (HKGP) in 2021. As the city’s first large-scale genome sequencing project, HKGP serves as a catalyst to benefit patients and their families with more precise diagnosis and personalized treatment through whole genome sequencing. It also aims to establish genome database of the local population, testing infrastructure and talent pool to address the healthcare needs of Hong Kong in the long run.</p> <p>For more information, please visit www.hkstp.org.</p>
Contract Period	12 months
Qualification	Master’s degree or above in Biomedical Sciences, Genetic Sciences, Health Sciences, Medical Statistics, or a related discipline, with at least 2 years' relevant experience. Fresh graduates holding a bachelor's degree with basic knowledge and experiences of research studies will be considered for Research Assistant (on-the-job training will be provided)
Other Requirements	<ul style="list-style-type: none"> • Experience in big data analysis and/or genetic variant analysis will be an advantage • Good analytical and communication skills • Great attention to detail • Great team mindset

Jumpstart Today. Lead Tomorrow.

#TLT2023

	<ul style="list-style-type: none"> • Fluency in spoken Cantonese; literacy in reading and writing Chinese is a must; strong written English is an advantage • Experience in patient care, clinical research, and the use of digital health technologies in healthcare settings would be advantageous
Job Responsibilities	<ul style="list-style-type: none"> • Involve in the process of Whole Genome Sequencing (WGS) and developing other sequencing-based workflow • Perform tertiary analysis for WGS data (on-job training will be provided) • Undertake basic literature review, research, and related clerical duties in the scientific team • Ensure smooth data mining process, working closely with the bioinformatics team • Prepare presentation materials for Multi-disciplinary Meeting • Undertake the preparation of weekly journal club of the scientific team • Perform any other duties assigned by senior officers

#TLT2023

Software Engineer Huawei Hong Kong Research Center (HKRC)

Reference No.	TLT004
Company Website	https://hkgp.org/en/about-hkgi/hkgi/
Company Profile	<p>Established in 2018, HKRC is a fast-growing international research center that focuses on chipsets, software engineering, AI and theoretical research. For a short span of three years, HKRC saw its staff increase from over 100 members in 2019 to more than 250 in 2022. They come from more than 24 countries and regions, with 48% being PhD holders.</p> <p>Having invested over USD52 million on technology cooperation, HKRC places great emphasis on R&D and has a successful track record in this regard. Equipped with well-furnished labs and offices, the research center hosts free tech talks and recreational activities on a regular basis.</p> <p>Going forward, Huawei aims to capitalize on the unique strengths of Hong Kong, bring together high-end talents worldwide, and tap into quality resources from local universities to create a world-class research hub for technology innovation.</p>
Contract Period	12 months
Qualification	Bachelor's degree or above, with graduation expected in 2023. Major in computer science, electronics engineering, information engineering, mathematics, physics, statistics or other engineering-related disciplines (preferred)
Other Requirements	<ul style="list-style-type: none">• Have a good understanding of the following fields (a plus): compilers, operating systems, distributed systems, embedded systems, cloud services, system/program analysis and verification; and• Be passionate about the tech sector, aspire to move the world forward, and have a strong career mindset to be part of Huawei's vision and mission: to bring digital to every person, home and organization for a fully connected, intelligent world

Technology Leaders of Tomorrow Programme 2023

**JSAB Technologies Limited**

Reference No.	TLT009
Company Website	http://www.jsab-tech.com/
Company Profile	JSAB Technologies Limited is a high-tech company specialized in the design, research and development, and sales of power semiconductor devices. JSAB is founded and led by a prestigious professor who is an IEEE Fellow in the field of silicon-based power semiconductor devices. JSAB possesses an outstanding technical team which includes PhD holders graduated from prestigious universities. The management team and technical leaders are from multinational semiconductor companies. The products are widely used in a variety of applications such as power management, motor control, etc. Join JSAB, be a <i>Power Semiconductors</i> expert in a fast-growing Group!
Contract Period	12 months
Qualification	University degree or above in Physics / Electronic Engineering / Applied Physics / Materials Science or in related technical discipline with background in microelectronics / semiconductor devices
Other Requirements	<ul style="list-style-type: none"> • Related working experience in the semiconductor industry (fresh graduate will be considered as Engineer); and • Knowledge in semiconductor devices (such as diodes, MOSFETs, IGBTs, etc.) and/or in electronic packaging, device characterization and PCB layout is definitely a plus
Job Responsibilities	<ul style="list-style-type: none"> • Manage power semiconductor device products; • Define product specification with sales and customers; • Provide technical advice to sales and customers; and • Perform product characterization, qualification and failure analysis

Assistant Mechanical Engineer Precision Robotics (Hong Kong) Limited

Reference No.	TLT011
Company Website	www.precisionrobotics.com
Company Profile	Precision Robotics (Hong Kong) (PRHK) Limited is an innovative robotic company which aims to advance surgical robotics with novel intelligent surgical technologies. Precision Robotics Limited is a spun-off company from Imperial College London, UK. As a technology start-up company, PRHK is a very fast-growing company with its head quarter based in the Hong Kong Science and Technology Park, and offices in London and Shanghai. Based on many years of cutting-edge world leading surgical robotics and AI research, PRHK was set up with targets on translating the academic research outcomes into clinical products enabling the next major transformation of robotic surgeries leading to better patient outcomes.
Contract Period	12 months
Qualification	Bachelor Degree or above in Mechanical Engineering or similar discipline.
Other Requirements	<ul style="list-style-type: none"> • Has experience in operating manufacturing machinery. • Has experience in hands-on industrial prototyping. • Familiar in SolidWorks. • Good at quality mindset. • Basic office software skill (including Word, Excel and Powerpoint) is a must. • Experience in small batch production/manufacturing is an advantage. • Knowledge in electrical engineering is an advantage
Job Responsibilities	<ul style="list-style-type: none"> • Assembling for medical product development. • Prepare industrial technical 2D drawings. • Hardware tools and Inventory management. • Sourcing and purchasing. • Able to prepare jig and fixture design is preferred

Company Profile	<p>SenseTime is the world's most valuable artificial intelligence (AI) unicorn focused on computer vision and deep learning technologies. Its leading AI technologies have powered many industries such as smart city, smartphone, mobile Internet, automobile, finance, retail, and robotics, etc. Its core technologies include face recognition, image recognition, character recognition, medical image recognition, video analysis and autonomous driving.</p> <p>SenseTime boasts more than 700 leading strategic partners and customers including MIT, CUHK, Qualcomm, NVIDIA, Honda, Alibaba, Suning, China Mobile, UnionPay, Wanda, HNA, Huawei, Xiaomi, OPPO, vivo, Weibo, iFLYTEK, and so forth. The company has offices in Hong Kong, Beijing, Shenzhen, Shanghai, Chengdu, Hangzhou, Kyoto, Tokyo and Singapore.</p> <p>Join us, in this journey of our inaugural mission towards a better world for a better future</p>
Contract Period	12 months
Qualification	Bachelor or above in Information Technology, Computer Science or related disciplines
Other Requirements	<ul style="list-style-type: none"> • Familiar with various type of hardware of PC & PC server • Proficient in Windows/ Linux/Mac system daily maintenance and error solution • Proficient in setting and manage router, switch, firewall and network system • Experienced in daily maintenance and repairing • Mature, flexible, fast-paced and able to work independently • Team player with good communications skills • Good command of spoken and written English, Mandarin and Cantonese • Able to work under pressure and meet tight deadline, well-organized, responsible, self-motivated, willing to learn, detail-oriented with good interpersonal skills

Technology Leaders of Tomorrow Programme 2023

Jumpstart Today. Lead Tomorrow.

#TLT2023

Job Responsibilities	<ul style="list-style-type: none">• Administer daily proper operation of IT related hardware and software, servers, IT infrastructure, networking, security system, applications and firewalls, video conferencing, projectors, door access & phone systems etc;• Responsible for any related installation and management of hardware & software; responsible for IDC Server hardware's maintenance and system installation;• Liaise with service providers / consultants for IT solutions as well as procurement for IT equipment; Provide IT hardware inventory support maintaining software license / hardware and inventory list;• Troubleshooting daily IT issues in local HK office, responsible for company's AD/network daily maintenance and guarantee workplace network's security;• Manage application systems including email systems;• Liaise and working with different partners to resolve incidents and problems;• Ad hoc tasks as assigned by manager and the team

Research and Development (R&D) Engineer (Algorithm)
Solos Technology Limited

Reference No.	TLT019
Company Website	www.solos.com.hk
Company Profile	<p>Solos Technology Limited is a Hong Kong based start-up company, established in October 2019. The company focuses its resources to design and manufacture the-state-of-the-art smart glasses for global market.</p> <p>Smart glasses designed by Solos integrates different sensors, hardware platforms, cloud, mobile phone & newly developed & invented algorithms to form a smart glasses ecosystem. Recently, the company launched several smart glasses products to market which were designed and built based on technologies from the in-house research results.</p>
Contract Period	12 months
Qualification	Bachelor or above in Electronics Engineering, Computer Engineering, Computer Science, Mathematics, or equivalent qualification
Other Requirements	<ul style="list-style-type: none"> • Experience in Matlab or Python for algorithm development is an advantage • Having the following knowledge and experiences is a plus: • Signal processing • Embedded firmware development. • Proficient in C/C++. • Ability to plan own work and make independent decisions. • Hard-working, self-disciplined and committed to the project
Job Responsibilities	<ul style="list-style-type: none"> • Undertake research and algorithm development in the areas of AI / digital signal and speech processing. • Carry out R&D for smart glasses applications. • Using Python or Matlab to perform simulation on filter design and signal processing algorithm development. • Implement and test algorithm in real-time platform. • Functional and system integration testing and verification. • Documentation writing such as algorithm design specification, test specification, patent and technical papers etc.

Company Website	https://take2health.net/
Company Profile	We are a healthcare start-up which explores, invents, and builds empowering platform to harness the power of biomedical sciences and informatics to deliver better healthcare solutions to individuals and communities with actionable information and results. Founded in Hong Kong SAR, expanding to Shenzhen, we aim to be a key driver that makes innovative healthcare inventions widely accessible to the public in China and across Asia. We are professional, committed, influential, pioneering, bold, and most importantly, we are young and have an unique corporate culture!
Contract Period	12 months
Qualification	Bachelor Degree or Higher Diploma in Medical Laboratory Science, Biomedical Science, Life Science or related field
Other Requirements	<ul style="list-style-type: none"> • Part I/II Registered Medical Laboratory Technologist with a valid Practising Certificate issued by the HKMLT Board • 1-3 years of experience in molecular genetics is an advantage, fresh graduates are also welcome • Self-motivated, strong sense of responsibility, and good team work • Good command of written and spoken English and Chinese (Cantonese) including Mandarin
Job Responsibilities	<ul style="list-style-type: none"> • Perform molecular clinical testing according to standard operating procedures • Maintain routine laboratory operation including but not limited to equipment maintenance and calibration, inventory management, lab records management • Assist in the setup of a new clinical molecular laboratory • Assist in laboratory accreditation preparation including but not limited to protocol writing and carrying out validation • Support in research and development activities; • Handle ad-hoc duties assigned by senior management • Shift duty is required

Company Website	https://www.tcl.com/hk/en/about-tcl
Company Profile	The Hong Kong Research Institute is a research and development center set up by TCL Technology in Hong Kong, focuses on artificial intelligence, 5G technology, Internet of Things, new sensors, financial technology new display materials, etc. At the same time, it is also actively carrying out technical cooperation with local universities and R&D centers in Hong Kong.
Contract Period	12 months
Qualification	Bachelor or above in Computer Science or related discipline
Other Requirements	<ul style="list-style-type: none"> • Proficiency in one or more AI technologies such as object detection, segmentation, image enhancement, large models, AIGC, etc. • Familiarity with mainstream AI frameworks and related technologies, and an understanding of the latest AI technology trends. • Good programming skills, with proficiency in at least one of the following languages: Python, C++, Java. • Familiarity with Tensorflow or Pytorch framework is a must. • Candidates with experience in industrial intelligent detection and smart manufacturing is preferred. • Candidates familiar with large model training and optimization techniques is preferred
Job Responsibilities	<ul style="list-style-type: none"> • Developing and implementing cutting-edge AI algorithms and strategies in order to improve product capabilities and achieve maximum value for the company. • Have a deep understanding of the business, accurately analyze problems, and develop suitable algorithms and strategies for the toB domain • Responsible for transforming toB scenarios and datasets into intelligent products, using AI technologies such as computer vision, large models, multi-modal speech and image, among others
